

C1000-031^{Q&As}

IBM Power Systems Scale-Up Technical Sales

Pass IBM C1000-031 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.pass4itsure.com/c1000-031.html>

100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by IBM Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

Which of the following is a RAS improvement of a Power System E980 over a Power System E880C?

- A. Redundant System Clocks in each node
- B. Redundant Voltage Regulators in each node
- C. Redundant Service Processors in each node
- D. Alternate Processor Recovery

Correct Answer: B

QUESTION 2

A customer consolidated several environments running IBM i, Linux and AIX into a Power System E980. Now the system's installed memory is insufficient. The customer believes that the Active Memory Expansion (AME) feature may resolve the memory issue.

Which of the following operating systems is capable of using the compression and decompression technology to resolve the issue?

- A. IBM i
- B. Red Hat
- C. SUSE
- D. AIX

Correct Answer: D

QUESTION 3

How is rack space reserved for cabling space when configuring Power System E980 servers?

- A. By designating 1U or 2U of space at either the top or bottom of the rack in the configuration.
- B. By using the supplied cable management arms that come with the server as standard.
- C. By requesting rack space during the pre-install Technical Delivery Assessment.
- D. By configuring extra blank rack panels.

Correct Answer: A

**QUESTION 4**

An installation engineer has configured a new POWER9 processor-based server with two VIOS partitions. The client is questioning the use of resources for two VIOS partitions instead of one.

What benefit does the dual VIOS configuration provide?

- A. Provides for better system performance and balance between client partitions.
- B. Allows for upgrading the OS on partitions without application downtime.
- C. Provides better Reliability, Availability and Serviceability (RAS).
- D. Allows for dedicated I/O adapters.

Correct Answer: A

QUESTION 5

What is a characteristic of POWER9 processor-based virtualized environments?

- A. Processors are assigned per whole core.
- B. Greater virtualization increases the cost of computing.
- C. Greater virtualization reduces workload costs.
- D. Resources must be dedicated at the PCIe card level.

Correct Answer: C
