**QUESTION 1**

Which statement is true regarding a security profiles policy and a security profile?

A. A security profiles policy is a synonym for a security profile.

B. A security profiles policy configures a security profile at run time

C. A security profile configures how a security profiles policy is used by a message flow.

D. A security profile configures the use of a security profile policy at deploy time.

Correct Answer: A

**QUESTION 2**

What is one reason to organize resources into applications?

A. It enables all processes using the module to reference the latest versions

B. It enables the ability to reference the resources in an Integration Project

C. It allows for Java and ESQL support in the same message flow

D. It provides runtime isolation of resources

Correct Answer: D

**QUESTION 3**

Which statement is true about shared libraries?

A. If a shared library (A) references another shared library (B), shared library (B) can create a reference to shared library (A)

B. Static libraries can reference shared libraries but cannot reference other static libraries

C. Integration Projects can reference shared libraries

D. A shared library must be deployed with or before an application that references it

Correct Answer: B

**QUESTION 4**

When developing RESTful APIs, what is the main purpose of the RESTAsyncRequest node?

A. Allows a REST request to be issued to a REST API and return control to the flow without waiting for a response

B. Allows a REST operation request to be exposed asynchronously and return control to the client without waiting for a response C Allows a REST operation request to be exposed asynchronously and return control to the flow without waiting for a response

C. Allows a REST request to be issued to a SOAP API and return control to the flow without waiting for a response

Correct Answer: A

You can use a RESTAsyncRequest node in a message flow to issue a REST request to an external REST API, and return control to the flow without waiting for a response. The response is received by a RESTAsyncResponse node, which can be in a separate message flow but must be in the same integration server. The nodes are used as a pair, and correlate responses against the original requests by using a unique identifier, which is specified on both nodes. https://www.ibm.com/support/knowledgecenter/SSMKHH_10.0.0/com.ibm.etools.mft.doc/bz90920 _.html

QUESTION 5

When referencing a policy within a node configuration, what is the format of the reference?

A. {PolicyProjectName}:PolicyName

B. PolicyProjectName:PolicyName

C. Policy:{PolicyName}

D. ApplicationName:PolicyName

Correct Answer: D
