Correct Answer: A

https://www.ibm.com/support/knowledgecenter/SSMKHH_10.0.0/com.ibm.etools.mft.doc/br26106 _.htm
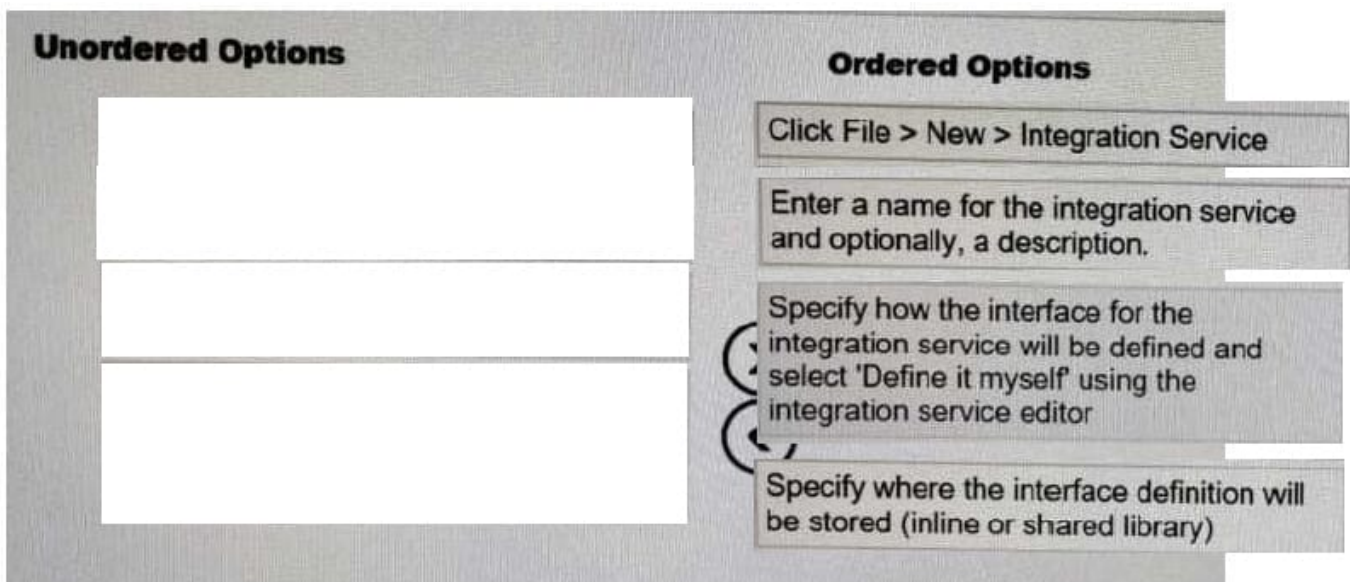

QUESTION 3

DRAG DROP

What is the correct order of steps to create an Integration Service from scratch?

Select and Place:

Unordered Options

Click File > New > Integration Service

Enter a name for the integration service and optionally, a description.

Specify where the interface definition will be stored (inline or shared library)

Specify how the interface for the integration service will be defined and select 'Define it myself' using the integration service editor

Ordered Options

>
<

Correct Answer:

Unordered Options

Ordered Options

Click File > New > Integration Service

Enter a name for the integration service and optionally, a description.

Specify how the interface for the integration service will be defined and select 'Define it myself' using the integration service editor

Specify where the interface definition will be stored (inline or shared library)

To create an integration service by defining a new interface, complete the following steps:
Procedure
• Open the New Integration Service wizard by using one of the following methods:
• Click File > New > Integration Service.
• In the Application Development view, click New > Start by creating an integration service.
• Right-click the white space of the Application Development view then click New > Integration Service.
• Enter a name for the integration service, and optionally a description.
• To specify how you want to define the interface for your integration service, select Define it myself using the integration service editor.
• Specify where you want to store your interface definition.
• If the definition will be used by this integration service only, store the definition in the integration service project.
• If the definition might be used by multiple integration services, store the definition in a shared library.

QUESTION 4

DRAG DROP

What are the correct sequence of steps to define the operations in a service interface?

Select and Place:

Correct Answer:

- Open your integration service in the Service editor by double-clicking the Service Description in the Application Development view, or by right-clicking and selecting Open.
- Select the Interface tab to see the interface editor.
- By default, a request-response operation is created when the integration service is created. Click the operation name to edit it.
- Add or remove request-response operations and one-way operations by using the icons.
- Add or remove inputs, outputs, and faults to operations by using the icons. In the Properties tab, click the name and type of an input, output, or fault to edit it. You can create a new complex type for an input, output, or fault by clicking the type and selecting New....

QUESTION 5

Which standard is used to define web service security mechanisms?

A. MSDN

B. Open Grid

C. innoQ

D. OASIS

Correct Answer: D
