QUESTION 1

In IBM Sterling Order Management (OMS), an implementation professional needs to define the menu options that a specific user will see. How should this requirement be configured?

A. Default menu options can be modified in the profile properties file created in the OMS installation folder

B. Personalized menu options can be developed using pre-defined Java class files located in the /externalDeployments folder.

C. New menu options can be configured in the Application Manager. This menu will be defined for a specific user, so it is not necessary to include this new menu in menu groups.

D. New menu options for a specific user can be defined in the Application Manager As with any other menus options defined in the solution, it should be included in a menu group.

Correct Answer: D

QUESTION 2

When considering supply and demand for a particular node with a sufficient supply, orders for the node are backordered when availability calculations are made for the configured demand type.

What must the implementation professional do to prevent backorder?

A. Configure an Allocated demand type to check for availability against only on-hand supply and purchase order supply

B. Supply type at a ship node must be marked as INFINITE

C. Use the default distribution rule

D. ONHAND supply types must be mapped to relevant demand types

Correct Answer: D

QUESTION 3
