QUESTION 1

What is true of thread pools when used in a Java Virtual Machine (JVM)?

- A. Once a thread pool is set up, it can be modified only by reinstalling the JVM.
- B. Thread pools are a shared resource generated by workstations connected to the same JVM.
- C. A thread pool is a collection of worker threads that efficiently execute asynchronous callbacks on behalf of the application.
- D. Thread pools enable components of the server to reuse threads and eliminate the need to create new threads at run time to service each new request.

Correct Answer: D

QUESTION 2

What indicates that there is no memory leak when analyzing garbage collection statistics over the life of a running Java Virtual Machine?

- A. A fairly sloping graph of free space before allocation failure.
- B. A fairly horizontal graph of free space before allocation failure.
- C. A fairly horizontal graph of free space after garbage collection.
- D. A straight sloping graph of free space after garbage collection.

Correct Answer: D
