QUESTION 2

Cutover work from cooling to heating is performed on the air handling units during the month of October each year. A requirement is to have the PM record generate Work Orders every Sunday during October.

What settings are necessary?

- A. Frequency = 1, Frequency Units = MONTHS, and Active Dates values entered on the Seasonal Dates tab
- B. Frequency = 7, Frequency Units = DAYS, and Active Days and Dates values entered on the Seasonal Dates tab
- C. Frequency = 7, Frequency Units = DAYS, and Generate Work Order When Meter Frequency is Reached checked
- D. Frequency = 1, Frequency Units = WEEKS, and Use Last Work Order's Start Date to Calculate Next Due Date checked

Correct Answer: B

QUESTION 3

A buyer runs a BIRT report which details Supplier Compliance. The buyer needs to further analyze the data in a spreadsheet to include an additional graph before reviewing the information with the manager.

Which process transforms the data?

- A. Export
- B. Preview
- C. Application Export
- D. Report Transformation

Correct Answer: D

**QUESTION 4**

A company orders and receives a case containing 36 light bulbs which are issued one at a time. What is created for this relationship?

- A. Multiplier
- B. Issue Unit
- C. Issue Type
- D. Conversion

Correct Answer: B

You order light bulbs in bulk and the unit of measure is a case, with a quantity received of 36. However, when you issue the item, you issue it one at a time. In this case, you can define a measure unit of CASE and another measure unit of EACH. You define a conversion ratio from CASE to EACH with a factor of 36. When you receive an order of bulbs into a storeroom, the received order unit of one CASE is converted into the storeroom issue unit of 36 EACH.
