### QUESTION 3

In Framework Manager, which of the following is a correct technique for maintaining packages?

- A. Edit the contents of a package by including or excluding model objects such as namespaces, folders, and query subjects.
- B. Publish packages to the network as well as to the content store in order to maintain model versioning and prevent report errors.

- C. Perform an impact analysis on a package to identify the impact of changing the cardinality of a relationship between two query subjects included in the package.
- D. When publishing packages, use file system version control so that reports created based on one version of a model will always run against that same version of the model regardless of how many times the package is published.

Correct Answer: A

#### QUESTION 4

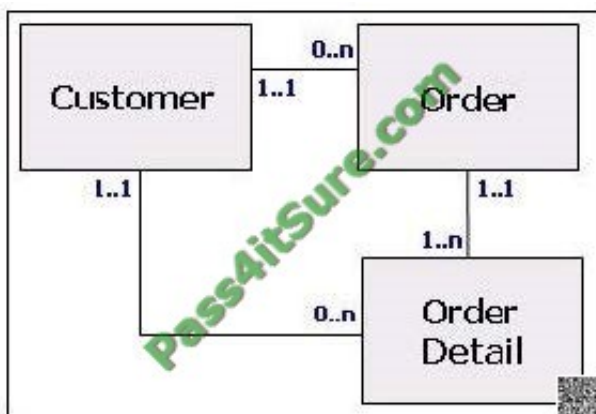

A recursive relationship exists between SALES\_STAFF\_CODE and MANAGER\_CODE in the SALES\_STAFF data source query subject. This query subject is provided in a model to report authors. Using this query subject alone, report authors cannot create a report that includes management staff and the salesstaff that report to them. How can the existing recursive relationship in the model be modified to provide this ability to report authors?

- A. Import a query subject that does not contain a recursive relationship.
- B. Create a star schema grouping that contains the SALES\_STAFF data source query subject and a shortcut to the SALES\_STAFF data source query subject.
- C. Create a model query subject with the appropriate relationship to the existing SALES\_STAFF data source query subject and make both available to report authors.
- D. Create a shortcut to the SALES\_STAFF data source query subject, and report authors will use it instead of the underlying query subject to create the required report.

Correct Answer: C

#### QUESTION 5

In a transitive relationship scenario, what problems exist when reporting from the tables below?

- A. The Order table must be included in each query.
- B. The Order Detail table has conflicting cardinalities.
- C. The priority path must be defined.

D. There is more than one possible path between the tables.

Correct Answer: D
