QUESTION 1

What are three non-functional requirements related to cloud computing?

- A. network - access for workload
- B. storage - type required for workload
- C. compute - requirements for workload
- D. availability - delivery making workload available
- E. security - define the level of compliance needed
- F. scalability - define the maximum number of users to support

Correct Answer: BDF

QUESTION 2

What greatly affects the speed of cloning VMware templates?

- A. speed of disk
- B. type of network card
- C. format of the VM image
- D. architecture of the video card

Correct Answer: C

QUESTION 3

Which statement is true about the use of topology based patterns within cloud computing?

- A. Deploying complex workloads is faster and easier.
- B. It allows the definition of objects which are different from normal database objects
- C. The Cloud Enabled Data Center adoption pattern is typically the entry point into the cloud solutions space.
- D. The virtual application model is undefined to include certain components, links, and policies that are available within the selected pattern type and any secondary pattern types that are associated with the selected one.

Correct Answer: C

QUESTION 4

What can be done to make maximum use of the cloud computing interoperability principle?

- A. Use standard protocols.
- B. Use hardware and software of a single vendor.
- C. Use the integration between OpenStack and CloudStack.
- D. Employ multiple system integrators to build a private cloud.

Correct Answer: A

QUESTION 5

A company is implementing a cloud storage solution that offers backup services for employee critical data. The company is funding each employee up to \$5 per month, and any excess usage will be charged per employee. What is the best option for this scenario based on cloud computing billing (metering/measuring) models?

- A. spot pricing
- B. elastic pricing
- C. cloud chargeback pricing
- D. subscription-based pricing

Correct Answer: A
