QUESTION 1

Which XForms item is used to define a table?

A. xforms:group

B. xforms:table

C. xforms:repeat

D. xforms:select

Correct Answer: C

QUESTION 2

David has added a new field to his form using relative positioning and had dragged it to a new location, but it does not appear when he tests it in either the Viewer or Webform Server. Why doesn\\'t the field appear during David\\'s tests?

A. David didn\\'t set an "offsetx" or "offsety" property.

B. Positioning a field "after" means it will appear on the next page.

C. David set the field to be positioned as "after" an item that doesn\\'t appear on the form.

D. The "offsetx" or "offsety" property is set so the field is now positioned off the viewing area in relation to the anchoring form item.

Correct Answer: D

QUESTION 3

Which of the following completes the statement? The HTML content embedded inside an XFDL form ...

A. Can be printed when the HTML"printvisible" option is set to \\'on\\'.

B. Can be displayed at design time.

C. Is automatically saved inside the form when it is submitted.

D. None of the above.

Correct Answer: D

QUESTION 4

Steve wants the position of object B to alwaysbe fixed and below object A, even when the object A has changed its position at run time. What should he do to ensure this?

A. He should ensure object A is relatively aligned to object B.

B. He should ensure object B is relatively aligned to object A.

C. He should ensure object B is absolutely aligned to object A.

D. He should use the item group functionality.

Correct Answer: B

QUESTION 5

Each of the following are valid functions of the Designer when working with web services, EXCEPT which one?

A. Customizing the message received when a web service fails.

B. Validating a field based on the result ofa web service.

C. Chaining multiple web service calls together.

D. Accessing the input and output instance in the Instance View.

Correct Answer: D
