**QUESTION 1**

An administrator can move a mail database archive when he moves a mail database to another server. Which statement defines when the archive database can be moved with the user's mail file?

- A. if the archive is located in the same path as the mail file
- B. if the archive is located on the same server as the mail file
- C. if the archive is located on the same domain as the mail file
- D. if the archive file is not larger than the defined mail quota size

Correct Answer: B

---

**QUESTION 2**

Where is the display name portion of a sender's SMTP e-mail address set?

- A. This is assigned in the mail settings policy.
- B. This is assigned in email preferences in the IBM Notes client.
- C. This is assigned by the "RFC822 phrase handling" setting in the user's Location document.
- D. This is assigned by the "RFC822 phrase handling" setting on the Configuration Settings document of the server.

Correct Answer: D

---

**QUESTION 3**

The administrator has been asked to move a user's mail file because the user has moved to a different office. When the mail file is moved, the Administration Process first moves it to the new server, then issues a request to delete the old mail file from its original mail server. Which statement defines what must be performed to complete the deletion process?

- A. The administrator must approve this mail file deletion.
- B. The mail file owner must approve the old mail file deletion.
- C. The mail file owner must accept the changes when prompted.
- D. The administrator must notify the mail file owner to accept the deletion.

Correct Answer: A

---

**QUESTION 4**

Sophia is applying ID encryption. What is the strongest level of ID encryption Sophia can mandate through a policy?

- A. 128-bit RC2
- B. 512-bit AES
- C. 256-bit AES
- D. 128-bit AES

Correct Answer: C

---

#### QUESTION 5

The IBM Notes Install Cleanup Executable (NICE) tool can detect if certain services (e.g. Notes Diagnostics) are running. What will happen if NICE does detect these services?

- A. NICE will stop them.
- B. NICE will instruct the user to stop them.
- C. NICE will ask the user to reboot the workstation in order to stop them.
- D. NICE will remove them from the services list and ask the user to reboot the workstation.

Correct Answer: A
