**QUESTION 1**

Lauren is creating a new form in a database and wants to add an action to that form for her users. How does Lauren add the action to her form?

- A. Lauren is not able to add an action to a form as actions are available for views only.
- B. Lauren would right-click in the QueryOpen event of the form and choose Insert Action.
- C. Lauren would right-click while in the Action section under Code in the Application Eclipse view and choose New Action.
- D. While Lauren has that form open in the IBM Domino Designer client, choose the menu option Create > Action > Action.

Correct Answer: D

QUESTION 2

Where are the SAML configuration settings specified?

- A. idp.xml
- B. IdP Catalog
- C. metadata.xml file
- D. IdP Configuration document in the IdP Catalog

Correct Answer: D

QUESTION 3

Florence is planning an application that will consist of several forms. Each form will contain the same five fields as well as the same static text for each of the fields. What method can Florence use to make sure the fields all look the same on each of the forms?

- A. Put the fields and static text into a subform and include the subform on the form.
- B. Put the fields and static text into a response form and include the response form on the form.
- C. Put the fields and static text into a Profile document and include the Profile document on the form.
- D. Put the fields and static text into one of the forms and then make that form a Shared Form so its fields will be available to all other forms.

Correct Answer: A

QUESTION 4

Charles has decided that he will add highlighting to a navigator object and has chosen the option "Highlight when clicked". What will be the result of choosing this option?

- A. The object remains highlighted while the user clicks the object.
- B. The object remains highlighted until the user clicks another object.
- C. The object remains highlighted until the user double-clicks the object.
- D. The object remains highlighted while hovering over the object until the user clicks on the object.

Correct Answer: B

QUESTION 5

Which two options are required when developing a server-side agent which connects to IBM DB2 via JDBC? (Choose two.)

- A. The IBM Domino database must be ODS 51.
- B. The IBM Notes application must be an NSFDB2 database.
- C. The JDBC class must be defined in the agent via the include call.
- D. The JDBC class must be defined via the IMPORT Java function prior to use.
- E. The JDBC driver JAR file must be imported into the Notes database or available in the JavaUserClasses notes.ini.

Correct Answer: CE
