QUESTION 1

Florence is planning an application that will consist of several forms. Each form will contain the same five fields as well as the same static text for each of the fields. What method can Florence use to make sure the fields all look the same on each of the forms?

A. Put the fields and static text into a subform and include the subform on the form.

B. Put the fields and static text into a response form and include the response form on the form.

C. Put the fields and static text into a Profile document and include the Profile document on the form.

D. Put the fields and static text into one of the forms and then make that form a Shared Form so its fields will be available to all other forms.

Correct Answer: A
