QUESTION 1

Marcela wants to see how the IBM Notes Traveler server is utilizing database connections. Which command should she run?

- A. tell traveler active
- B. tell traveler log db
- C. tell traveler help db
- D. tell traveler stat show

Correct Answer: D

QUESTION 2

What is the result of running the tell traveler status console command when there are no problems outstanding?

- A. The current debug parameters enabled on the server.
- B. The number of HTTP threads currently set on the server.
- C. "IBM Notes Traveler overall status is GREEN" is displayed.
- D. It depends on the setting of NTS_STATUS_CPU_PCT_GREEN_THRESHOLD.

Correct Answer: C

QUESTION 3

What reason might an administrator choose to implement the IBM Notes Traveler default settings over the Notes Traveler Policy Settings document?

- A. The default settings document allows for different device settings per group.
- B. The default settings document applies updates almost immediately to Notes Traveler users
- C. The default settings document takes precedence over the Notes Traveler Policy Settings document
- D. The default settings document contains more options above and beyond the Notes Traveler Policy Settings document.

Correct Answer: B

QUESTION 4

What step must be taken before running the tell traveler SystemDump console command?

- A. The Traveler task must be ended.
- B. All devices must be synchronized.
- C. The IBM Domino mail server must be put in restricted state.
- D. None. The command is not disruptive and can be run at any time.

Correct Answer: D

QUESTION 5

Which deployment will allow a system administrator to deploy a high availability solution with automatic failover using IBM Notes Traveler 9.0 and Microsoft SQL Server?

- A. Notes Traveler does not support automatic failover for the database server.
- B. one Notes Traveler Server, one IP sprayer, and two SQL Servers running log mirroring
- C. two IP sprayers, two Notes Traveler servers, and two SQL Servers running Q replication
- D. one IP sprayer, two Notes Traveler servers, two SQL Servers, and one SQL Server acting as a witness server

Correct Answer: D
