QUESTION 1

Which two properties files need to be edited before manually registering/unregistering an IBM Sametime 9.0 server component?

- A. SSCHost.properties and productConfig.properties
- B. console.properties and productConfig.properties
- C. productConfig.properties and NodeConfig.properties
- D. sametime.properties and productConfiguration.properties

Correct Answer: B

QUESTION 2

What is the IBM Sametime Configuration Validator designed to do?

- A. monitor the Sametime Community statistics
- B. provide realtime reporting of Sametime issues.
- C. load the configuration information from the entire Sametime environment
- D. load the configuration information from just the Sametime Community Servers

Correct Answer: C

QUESTION 3

Where would an IBM Sametime Administrator manage the Instant Messaging policies for the Sametime Community?

- A. in the Sametime Policy database in the IBM Domino Data directory on the Sametime Community Server
- B. in the Sametime Policy database in the IBM Domino Program directory on the Sametime Community Server
- C. on the Configuration > Community Service tab in the Sametime Administration Tool on the Sametime Community Server
- D. on the Sametime System Console > Sametime System Console > Manage Policies > Instant Messaging tab in the Sametime System Console

Correct Answer: D

QUESTION 4

What IBM Sametime server does the Sametime client register to for audio/video services?

- A. Video MCU
- B. Video Manager
- C. SIP Proxy Registrar
- D. Conference Manager

Correct Answer: D

QUESTION 5

Carl has imported the LTPA token into the IBM WebSphere instances that the IBM Sametime Meeting Server is running on. However, after using other Sametime servers and then accessing the Sametime Meeting Server, a user complained that he was being challenged to provide his credentials while his colleagues were not.

Why is this user being challenged to re-authenticate?

- A. Carl needs to re-start the Sametime Meeting Server since the LTPA token has expired.
- B. The LTPA token must be corrupt and needs Carl to re-import it again for single sign-on (SSO) to work properly.
- C. The user's Active Directory password has expired and needs to be reset so that the Sametime Meeting Server can recognize the new credentials.
- D. The user must enter the fully qualified domain name of the Sametime server when accessing the Sametime server to authenticate successfully using SSO.

Correct Answer: D
