- A. Install a portlet.
- B. Clone a skin module.
- C. Delete a shared library.
- D. Back up an IBM WebSphere Portal server configuration.
- E. Export all property files from a WebSphere Portal server.

Correct Answer: DE

QUESTION 4

When developing with IBM Web Sphere Portal 8.5 themes, which parameter for the r:datasource tag will help speed up development by requiring fewer server restarts?

- A. max-age
- B. theme-uri
- C. reloadInterval
- D. reloadingEnabled

Correct Answer: D

Explanation: DB2 data source, automatic client reroute enabled, restart admin

QUESTION 5

George is using the PortletStateManager getPortletStateManager (PortletRequest request, PortletResponse response) method in his portlet code.

Where should George use this method in his code for best performance?

- A. init
- B. doEdit
- C. doview
- D. processAction

Correct Answer: B

:

PortletStateManager getPortletStateManager(PortletRequest request, PortletResponse response)

This method returns a PortletStateManager object which you can use during action processing and rendering (for example in the processAction method, doView method, doEdit method, etc.). The PortletStateManager interface adds

additional methods to extend the generic StateManagerService interface, which, for example, allows you to directly read the current request-specific navigational state of the portlet (portlet mode, window state, and render parameters).
