QUESTION 1

Sam wants to create a portlet that uses a custom portlet mode that is not defined in the JSR 286 specification.

After implementing the correct methods, what additional step must he do to use a custom portlet mode?

A. Add the custom portlet mode to the portlet deployment descriptor.

B. Add a resource bundle to the portlet that has the name of the custom portlet mode.

C. Configure the portlet after installation to map the custom portlet mode to the server- defined portlet mode.

D. Enable the specific custom portlet mode at the container level by setting the correct property in the resource environment provider.

Correct Answer: A

QUESTION 2

Which two options are valid uses of the XML Configuration interface? (Choose two.)

A. Install a portlet.

B. Clone a skin module.

C. Delete a shared library.

D. Back up an IBM WebSphere Portal server configuration.

E. Export all property files from a WebSphere Portal server.

Correct Answer: DE

QUESTION 3

Chris is working on a custom theme and it is required to work on multiple runtimes.

How does he implement the custom theme?

A. Abstract dynamic content and give it a logical name.

B. Create multiple copies oftheme.html for each runtime.

C. Create multiple dynamic content spots for each runtime.

D. Use the to add multiple Java Server Pages definitions.

Correct Answer: A

you can add dynamic content to your custom theme by using either client-side or server- side logic.

Client-side logic

You can add client-side logic, for example JavaScript, iWidgets, live text, to the WebDAV file store and reference it in the theme.html file .

Server-side logic

You can reference a JSP in the theme.html file by using a dynamic content spot. You cannot add a JSP to WebDAV, because it needs a servlet context to compile and execute.

QUESTION 4

Which feature of the Theme Optimization Analyzer portlet will analyze the theme and its components for known issues and then report the number of errors, warnings and informational messages?

A. Reports

B. Validation Reports

C. Development Mode

D. Remote Debugging

Correct Answer: B

Validation reports Use the validation portlet to verify that your theme contains no errors. The validation report analyzes your theme and theme components for known issues and reports the number of errors, warnings, and informational messages. It also includes a detailed explanation about how to fix the errors that occur.

QUESTION 5

Which is true about the Cache Manager Service resource environment provider in IBM WebSphere Portal?

A. It can be used to manage the cache scope of a portlet.

B. It can be used to manage different caches used by WebSphere Portal.

C. It can be used to define the cache mechanism of a WebSphere Portal page.

D. It can be used to define the cache strategy of the WebSphere Portal\\'s theme.

Correct Answer: B

Cache Manager Service

The portal Cache Manager Service is responsible for managing the different caches used in WebSphere Portal Express.
