QUESTION 1

Rachel needs to configure access to her company\\\'s mail system by using a portlet. The company requires users to be prompted for their user name and password the first time they access their mail. This information is then stored for future access.

What type of credential vault slot should Rachel use?

A. system slot

B. shared user slot

C. portlet shared slot

D. administrative slot

Correct Answer: C

QUESTION 2

What notable difference does a custom portlet service have that is compatible with earlier versions of IBM WebSphere Portal?

A. The services are retrieved differently depending on the type of portlet in use.

B. Standard portlet services are synchronized, but IBM Portlet API services are not synchronized.

C. Both services are retrieved by using a JNDI call, but they always return different implementations.

D. Legacy services are stored in the session, and standard services are stored in the application object.

Correct Answer: C

QUESTION 3

Ella developed a custom application object to extend the Personalization engine with a custom user attribute. The custom class was packaged into a JAR file archive and placed on the server. Then, the portal was restarted. What must Ella do before she can create a business rule using the new user attribute?

A. Add the attribute directly to the page.

B. Add a Resource Collection to the Personalization engine.

C. Add the Application Object to the Personalization engine.

D. "Show Rule Mappings" needs to be enabled on the portlet.

Correct Answer: C

An application object is a java object existing at a known location in the request context. Defining an application object involves specifying the object\\\'s class name (as a JavaTM class), and specifying a key (string key into a session

attribute) to find it in the request context. Personalization

---

QUESTION 4

Kaveri needs to develop a portletthat uses Ajax Proxy to get the news feed from the URL http:/Avww.ibm.com/developerworks/news/dw_dwtp.rss. The following configuration information is present in the proxy-config.xml:

Which is the correct URL to use in the Ajax call?

A. http://myportal.com:10040/wps/devworks/news/dw_dwtp.rss

B. http://myportaLcom:10040Avps/proxy/devworks/news/dw_dwtp.rss

C. http://myportal.com:10040/wps/proxy/http/www.ibmxom/developerworks/news/dw_dwtp.rss

D. http://myportaLcom:10040/wps/devworks/http/www.ibm.com/developerworks/news/dw_dwtp.rss

Correct Answer: D

QUESTION 5

Sam wants to create a portlet that uses a custom portlet mode that is not defined in the JSR 286 specification.

After implementing the correct methods, what additional step must he do to use a custom portlet mode?

A. Add the custom portlet mode to the portlet deployment descriptor.

B. Add a resource bundle to the portlet that has the name of the custom portlet mode.

C. Configure the portlet after installation to map the custom portlet mode to the server- defined portlet mode.

D. Enable the specific custom portlet mode at the container level by setting the correct property in the resource environment provider.

Correct Answer: A
