QUESTION 1

Which of the following is not a valid reason for deploying a separate Personalization Server?

A. To reduce the load on the IBM WebSphere Portal Servers.

B. To use Personalization in Web Services that will provide personalized XML content stream for use by portlets.

C. For generation of a personalized RSS feed for use by portlets or other software components.

D. To provide dedicated resources for rendering a portlet that may have complex security and personalization rules.

Correct Answer: D

QUESTION 2

Holly\\'s organization performs staging from a system without an external security manager to a system with an external security manager. All resources in the target system are managed internally. The external security manager is not used for managing authorization decisions in this scenario. Which of the following options occurs during staging of subsequent releases?

A. Resources have to be manually recreated each time a staging occurs.

B. Resources with updated entitlements show in the XML configuration interface file as externally managed resources.

C. Resources withupdated entitlements show in the XML configuration interface file as internally managed resources.

D. Resources lose all attributes and security controls, but remain in the Portal Access Control as an externally managed resource.

Correct Answer: C

QUESTION 3

Sunil is designing a portal cluster for production. He is using a 32-bit version of IBM WebSphere Portal server and has several multiprocessor servers with 16 GB of memory. What type of cluster configuration should he use?

A. A vertical cluster, because it ensures minimal latency between cluster members.

B. A horizontal cluster, because it provides fault tolerance.

C. A combination of vertical and horizontal clusters to gain the benefits of both configurationtypes.

D. A multi-production cluster because it meets both high-availability and high-performance criteria.

Correct Answer: C

QUESTION 4

Which of the following site analysis events cannot be logged by IBM WebSphere Portal\'s logging functionality at the server level?

A. Page management, such as creating, reading, updating, deleting pages

B. Requests of portlets by users

C. Amount of data fetched by a portlet from a back-end database

D. Session activities, such as login, logout, timeout, login failed

Correct Answer: C

QUESTION 5

Choose the two items that correctly describe Cooperative Portlets.

A. Cooperative portlets communicate by using properties that are produced and consumed by portlet actions.

B. An administrator can use cooperative portlet support with either IBM, JSR 168, or JSR 286 portlets.

C. JSR 286 portlets require an additional WSDL deployment descriptor which defines portlet actions.

D. Cooperative portlets represent an IBM-specific API for publish/subscribe communication between portlets.

Correct Answer: AD
