**QUESTION 1**

When syndicating an IBM Web Content Manager library, the following statements are all true except:

- A. First-time syndication to an existing library is not supported. If you attempt to syndicate a library to a subscriber that already has a library with the same name, an error results.
- B. Information about a Library is only syndicated the first time syndication occurs and not on subsequent updates and rebuilds. If a library is renamed or library user access is changed, this information is not syndicated to the Subscriber.
- C. If content from one library (Library A) uses an item from another library (Library B), you must include both libraries in the syndicator. Including both libraries ensures that all items are syndicated successfully.
- D. When you switch from "all item" syndication to "live and projects" syndication or "live item" syndication, any drafts previously syndicated to the subscriber are removed.

Correct Answer: D

QUESTION 2

JSP files can be stored and referenced in all of the following locations, except which of the following options?

- A. was_profile_root/installedApps/node-name/wcm.ear/ilwwcm.war
- B. /wps/customapplication/jsp/
- C. was_profile_root/installedApps/node-name/PA_WCMLocalRendering.ear/ilwwcm-localrende.war
- D. /wps/customapplication;jsp/

Correct Answer: B

QUESTION 3

The HR department has a job posting content item published on their IBM Web Content Manager website. The job posting should only appear on their live website until the end of the month. What is the best way the HR department can ensure the job posting is removed from the live website at the end of the month?

- A. Manually delete the content item from the library at the end of the month.
- B. Set an expiry date for the end of the month.
- C. Set the connect.connector.httpconnector.defaultcacheexpires property in the WCM WCMConfigService service to expire the content item at the end of the month.
- D. Restart the content item's workflow on the date the content item should be removed.

Correct Answer: B

**QUESTION 4**

All of the following examples can be used to retrieve an IBM WebContent Manager workspace item except:

- A. `webContentService.getRepository().getWorkspace((Principal) portletRequest.getUser());`
- B. `webContentService.getRepository().getSystemWorkspace();`
- C. `webContentService.getRepository().getWorkspace("my username", "my password");`
- D. `webContentService.getRepository().getSystemWorkspace("my username", "my password");`

Correct Answer: D

QUESTION 5

Phil is creating a workflow to allow users to have content removed from the site once it is no longer valid. This is set by using the expire date field on the content item. His publish stage includes a scheduled move action to move the content to the expire stage on a given date, based on the general date 1 field. One of his content authors creates a content item that has a general date 1 field of the 5th of June, and an expiry date of the 12th of June.

Which of the following statements describes the behavior of this content item?

- A. On the 5th of June, the content item will move to the expire stage, and will be removed from the site
- B. On the 5th of June, the content item will stay in the publish stage as the expiry date has not been reached.
- C. On the 5th of June, the content item will move to the expire stage, but will not be removed from the site until the 12th of June.
- D. On the 12th of June, the content item will move to the expire stage and will be removed from the site.

Correct Answer: C
