**QUESTION 1**

Menno has hidden the design of a database and finds out later that most of the design elements have the "prohibit design refresh or replace to modify this element" flag set.

How can he undo this?

- A. He cannot; hidden design is hidden forever.
- B. He can simply replace the design with a blank template, and then replace again with the corrected template.
- C. He needs to go into the design and untag each and every element manually, and then simply replace the design with the updated (new) template once more to update with the last changed.
- D. He needs to create an agent that uses the LotusScript Design classes to remove every design element in the database, and afterward use the corrected template to replace the whole design once more.

Correct Answer: D

QUESTION 2

Cindy wants to edit her style sheet resource using a third-party tool. Which one of the following should Cindy do?

- A. From the Resources>Style Sheets view, select the style sheet and choose Open With, then identify her preferred editor.
- B. From the Resources>Style Sheets view, select the style sheet and choose Open With>External Editor, then identify her preferred editor.
- C. From the Resources>Style Sheets view, select the style sheet and choose Open With>Thirdparty Tool, then identify her preferred editor.
- D. From the Resources>Style Sheets view, select the style sheet and choose Export to save the style sheet to the file system, then open it in her preferred editor. After making her changes, she will need to choose Sync to bring the changes into the application.

Correct Answer: B

QUESTION 3

Roberto has been asked to modify the Membership view in the Video Rental application. A green checkmark should appear in the Approved view column for each document where membership has been approved. He set the view column property to "Display values as icons", and now he needs to write a column formula.

What is the column formula he needs to use?

- A. @if(Approved = "Yes"; @Icon(82); @Icon(0))
- B. @if(Approved = "Yes"; @OpenImageResource("checkmark.gif"); "\\")
- C. @If(Approved = "Yes"; 82; 0)

D. @If(Approved = "Yes"; @Column(82); @Column(0))

Correct Answer: C

QUESTION 4

Bram needs to change a large number of documents in an existing application and add the three fields from the Document NewDoc to each existing document. He has created a document collection of the documents to be changed.

How can he best achieve this?

A. Call Collection.Stampall ("Location" : "HomeID" : "HelpNr" ; "NY" : "123" : "80012345678")

B. Call Collection.StampallMulti ("Location" : "HomeID" : "HelpNr" ; "NY" : "123" : "80012345678")

C. Call Collection.StampAllMulti (NewDoc)

D. Call Collection. Stampall (NewDoc)

Correct Answer: C

QUESTION 5

Marcello wants to create a custom startup page for his customer database, using different buttons and values from profile and normal documents.

How can he achieve this?

A. Create an outline with calculated entries, and display this directly through a frameset.

B. Create a page with calculated text and actions, and display this using a frameset. Create a frameset, and display that page with dynamic text.

C. Create a view with custom actions that calculate what actions the user might want to take.

D. Create a form and use action buttons, only calculated for display fields and computed text to display all available options to this specific user. Set the database properties to start with a doclink in the about database document to any document created with this form.

Correct Answer: D
