**QUESTION 1**

Monique's laptop was stolen. Monique had locally encrypted the databases on her machine using medium encryption. Which one of the following can unauthorized users do?

- A. Nothing
- B. Compact the databases
- C. Read copies of the databases made through the operating system
- D. Use their user ids to access local databases on Monique's workstation

Correct Answer: A

QUESTION 2

With server-to-server replication, what is the minimal access level, that a server must have to an application to replicate not only documents, but also design elements?

- A. Reader
- B. Designer
- C. Manager
- D. Servers always replicate any document independent of their access rights.

Correct Answer: B

QUESTION 3

Hector is working on an XPages application and wants to let users navigate to particular pages by clicking on images. How can he do this task?

- A. Define the images' onclick events to point to simple actions configured as New Page Actions and select the appropriate page for each image in the Action's Target property.
- B. Define the images' onclick events to point to simple actions configured as New Page Actions and select the appropriate XPage for each image in the Action's Target property.
- C. Define the images' onclick events to point to simple actions configured as Open Page Actions and select the appropriate XPage for each image in the Action's Target property.
- D. Define the images' onclick events to point to simple actions configured as Open XPage Actions and select the appropriate XPage for each image in the Action's Target property.

Correct Answer: C

QUESTION 4

Olga needs to integrate data from an Oracle database into her XPages application. Which of the following options would allow Olga to do that task?

- A. Nothing. Lotus Notes and Lotus Domino are able to access Oracle databases directly.
- B. DECS or LEI is installed and configured.
- C. Olga needs to install the EnterpriseDataConnection library from OpenNTF first.
- D. Unfortunately, there is no possibility to access Oracle data from an XPages application.

Correct Answer: B

QUESTION 5

Linda would like to have a navigator pane for her XPages application. What would be the best way to implement this pane?

- A. She downloads and installs a JavaScript library for a menu.
- B. Unfortunately, there is no simple way to do it, so she has to build it on every XPage.
- C. She puts the links for her navigation together by building a custom control and can use that for every page that she needs.
- D. She has to build the navigator by using a Notes view with documents defining each link in her navigator. She then integrates that view in each XPage that her application needs.

Correct Answer: C
