**QUESTION 1**

With her Lotus Notes applications, Marianne has extensively used the QueryOpen event of the Notes Form to change the representation of some data. Is there a way to do the same with XPages?

- A. Yes, on the Events tab of any XPage, you can find the BeforePageLoad event, where you can do similar things.
- B. Unfortunately, there is no comparable functionality in XPages to do similar things.
- C. Yes, on the Basic tab of any XPage, you can find the QueryOpen property, which can be used.
- D. Unfortunately, there is no way to influence any data when XPages are loaded. You have to change them after loading and before the user gets control.

Correct Answer: A

---

**QUESTION 2**

Joanne is working with two other developers on a company-wide intranet project built in XPages. Each developer has taken responsibility for different aspects of the site, but some of these tasks occur in multiple places within the intranet. How should they manage these tasks?

- A. Create subforms within the XPages to separate and reuse the code.
- B. Create sections on each XPage to incorporate the shared functionality.
- C. Create custom controls for each aspect of the site that is repeated in multiple places.
- D. Create separate XPages for each primary area, then use the Source tab of the Editor view to copy the XML representing each subset of functionality and paste it onto the necessary XPages.

Correct Answer: C

---

**QUESTION 3**

Jim is looking at the Properties dialog box for an agent. Which one of the following best describes the use of the "Allow user activation" option?

- A. Allows users with Editor access or above in the ACL to run an agent
- B. Allows users with Author access or above in the ACL to run an agent
- C. Allows users with Editor access or above in the ACL to enable an agent
- D. Allows users with Author access or above in the ACL to enable an agent

Correct Answer: C

---

**QUESTION 4**

Olivia is writing a Discussion application using XPages. She added a button on her main topic XPage to create a response document for this discussion. What should she do to generate the response document?

- A. Add a Create New Document simple action to the form QuerySave event
- B. Add a Create New Document simple action to the button onclick event
- C. Add a Create Response Document simple action to the button onclick event
- D. Add a Create Response Document simple action to the form QuerySave event

Correct Answer: C

---

### QUESTION 5

Terry wants to update the meal service planning XPage application so that users can now use XPages in the Lotus Notes client. What does Terry need to do for the application to automatically launch the correct XPage when the database is opened?

- A. Open the database properties, select the Launch tab, set the When opened in the Notes client property to Open designated XPage, and then select the correct XPage.
- B. Open the database properties, select the Basics tab, set the When opened in the Notes client property to Open designated XPage, and then select the correct XPage.
- C. Open the database properties, select the Display tab, set the When opened in the Notes client property to Open designated XPage, and then select the correct XPage.
- D. Open the database properties, select the Design tab, set the When opened in the Notes client property to Open designated XPage, and then select the correct XPage.

Correct Answer: A
