**QUESTION 1**

Hadi is creating a new XPage. His XPage design now shows the company logo and banner. How can Hadi now add fields to the XPage?

- A. Right-click where each field should be placed and select Insert > Field and select the type of field (such as Edit Box, Check Box, Radio Button, and so on).
- B. For each field, drag the associated type of control (such as Edit Box, Check Box, Radio Button, and so on) from the Core Controls to the XPage design.
- C. For each field, drag the associated type of control (such as Edit Box, Check Box, Radio Button, and so on) from under XPages on the Applications panel to the XPage design.
- D. On the XPage design, click and drag to draw a box to create each field. As the mouse button is released for each field box, select the type of control to associate with the field (such as Edit Box, Check Box, Radio Button, and so on).

Correct Answer: B

QUESTION 2

Nancy is creating a Web application and she needs anonymous users to be able to read content and create certain documents. What does Nancy need to do?

- A. Anonymous users cannot create documents if the ACL is set to Reader.
- B. Anonymous must be set to Author in the ACL and forms must be blocked to Anonymous users.
- C. Nancy needs to create an Anonymous entry to the ACL with access set to Author. Then, using @Formula she needs to validate if a document is being created by an Anonymous user.
- D. Nancy needs to create an Anonymous entry to the ACL with access set to Reader and the option "Write public documents." She also needs to make the forms Available to Public Access users.

Correct Answer: D

QUESTION 3

Pablo has created an XPage to use for browsing and editing customer data. He would like to add a button which asks users if they are sure that they want to update the customer data. The button saves the changes if users indicate that they are sure. How can Pablo create this button?

- A. Drag a button control from the core controls onto the XPage canvas. From the Control properties, select Save as the button type, and enable the Confirm option.
- B. Drag a button control from the core controls onto the XPage canvas. From the Control properties, select Save as the button type. A confirmation prompt is included by default.
- C. Drag a button control from the core controls onto the XPage canvas. From the Control properties, select Submit as the button type. From the events panel, add a server-side simple action. Select Confirm Action for the action.

D. Drag a button control from the core controls onto the XPage canvas. From the Control properties, select Submit as the button type. From the events panel, add a client-side simple action. Select Confirm Action for the action.

Correct Answer: C

QUESTION 4

What is the purpose of using XSLT in a Lotus Domino Web application?

- A. To define what DXL should be available for export.
- B. To allow a Web service to interact with a Java agent.
- C. To display a view as HTML without using a Java applet.
- D. To transform XML documents to HTML or even to another XML document.

Correct Answer: D

QUESTION 5

XPages are Ajax-enabled. Which option best describes what that statement means?

- A. With Ajax, XPages can provide type-ahead.
- B. With Ajax, XPages can be partially refreshed instead of reloaded completely for each change.
- C. Ajax allows for lazy loading of content and code.
- D. All of the above.

Correct Answer: D
