QUESTION 1

What does this theme XML code do if it is used in an XPages application?

```
<theme extends="webstandard">
        <control>
                <name>Button.Command</name>
                <property>
                        <name>dojoType</name>
                        <value>dijit.form.Button</value>
                </property>
        </control>
</theme>
```

A. Nothing, because the XML should be dojox.form.Button.
