QUESTION 1

When preparing to deploy a system using Deployment Manager, which one of the following files contains the list of assets to be exported?

- A. Half map.
- B. Export dataset.
- C. Export manifest.
- D. Deployment dataset.

Correct Answer: C

QUESTION 2

When using the FileNet Enterprise Manager import manifest function, the "Retry Failed Imports" option handles which one of the following situations?

- A. A transient error has occurred, and the importer will continue trying until the import is successful.
- B. The import of an object has failed, so the importer will create the object with as much information as it has, then log an error.
- C. The import of an object failed, so the importer will suspend itself while it searches for another definition of the object in another export XML file.
- D. Object A has a dependency on Object B, but Object B appears after Object A in the export XML file, and the importer will resolve the error when Object B is encountered.

Correct Answer: D

QUESTION 3

A company has been informed that a government, regulation dictating how long their corporate financial documents need to be saved, has changed from 5 to 3 years. The legal department has instructed the administrator for the Content Platform Engine to allow deletion for all documents that meet this change in regulations.

What two actions does the administrator need to take?

- A. Create a disposal job
- B. Create a disposal policy
- C. Create a retention update job
- D. Create a retention update policy
- E. Create a retention reduction allow job

Correct Answer: C

QUESTION 4

In which two scenarios should the Content Consistency Checker be used? (choose two.)

- A. Content Engine is performing slow.
- B. If search templates are not working.
- C. After restoring a storage area from backup media.
- D. To troubleshoot Fixed Content Device connectivity.
- E. If users are unable to view the content of a document when the content is stored in a file storage area, even when they have view-content permissions on the document.

Correct Answer: CE

QUESTION 5

In a High Availability environment for Content Engine, how should IBM FileNet Enterprise Manager be connected to the Content Engine server?

- A. Using Enterprise JavaBeans (EJB) protocol for a specific node.
- B. Using WSI protocol for multiple nodes (e.g. load-balancer URL).
- C. Using Web Service Interoperability (WSI) protocol for a specific node.
- D. Using EJB protocol for multiple nodes (e.g. corbaloc URL for WebSphere).

Correct Answer: C
