QUESTION 1

A customer is preparing to install and deploy IBM FileNet P8 Content Platform Engine (CPE) V5.2.1. Prior to the installation, which two of the following entities must already exist?

- A. IBM Case Foundation
- B. IBM CPE V5.2.1 Client
- C. J2EE application server
- D. Database for object stores
- E. IBM Content Search Services

Correct Answer: AC

QUESTION 2

Users in a legal department are unable to perform a content based search successfully. The administrator checks the document classes in Administration Console for Content Engine and confirms that they are CBR enabled. During the administrator's troubleshooting it is discovered that the index is corrupt. The administrator reviews remediation steps, such as reindexing, to fix the corrupt full-text index.

What else can the administrator do to help identify document-related index failures?

- A. Review the UNRECOGNIZED_EXTRACTION log for the index errors.
- B. Set the "Text Extracted" property on the document class that is going to be indexed.
- C. Select "Propagate" to source in the Indexing failures recording level on the object store.
- D. Use the IBM Content Services command-line administration tool to help identify failures.

Correct Answer: C

QUESTION 3

An administrator is setting up a new Fixed Content Device to an Image Services (IS) server for FCS-IS.

During the setup and testing of the configuration, an extract of the error seen is:

```
SSI FNRCE0000E - ERROR
```

```
IS_SSI_8502: SSI_Base: g_logon error: called sec.logon() err=
```

Based on these messages, what would be the best next step for the administrator to troubleshoot this message?

- A. On the IS server run fn_msg with the error tuple.

- B. Ping the IS server from the FCM server to verify network connectivity.
- C. Check the user name defined in the IS datasource in the WebSphere Application Server.
- D. On the IS server run INX_tool>ce_info and verify that the FCM Domain and Object Store are listed.

Correct Answer: D

QUESTION 4

By default what log file will be generated in IBM FileNet Content Manager V.5.2.1 when an administrator enables tracing for process clients to troubleshooting a problem were workflows will not manually launch when content is added to the object store?

- A. pe_api_trace.log
- B. p8_server_trace.log
- C. File name configured in the fnlog4j.properties file.
- D. File name configured in the application server administration console.

Correct Answer: B

QUESTION 5

By default Content Search Services logs are stored in the \IBM\ Content Search Services\CSS Server\logs directory.

What file in this directory would you review for information, warning, and error messages that are logged during server activity?

- A. default*.log
- B. monitor*.csv
- C. adminAudit.csv
- D. p8_css_trace*.log

Correct Answer: B
