QUESTION 1

When reviewing the results of a Match job you notice that some records are not included in a match group.

Which option would you review to determine why the records are not matching?

- A. Change the Match cut-off to-100.
- B. Change the Survive rule to include Residual records.
- C. Check the records for missing data values in the block fields.
- D. Change the match from Two-source many-to-many to Two-source one-to-many.

Correct Answer: A

QUESTION 2

A major international financial firm has clients in over 35 countries, including the U.S. and Japan. A requirement exists to standardize all addresses and validate the U.S. and Japanese physical addresses.

How can this be accomplished?

- A. Use AVI to process all addresses within the single source.
- B. Use USAC to certify the U.S. addresses, AVI for the Japan addresses and custom rule sets for the remaining countries.
- C. Filter all the records by country. Use AVI for the U.S. and Japan and domain-specific rule sets for the remaining countries.
- D. Filter U.S., Japan and remaining countries into individual files. Process the U.S. and Japan addresses through AVI and use MNS for the remaining countries.

Correct Answer: A

QUESTION 3

Based on the following complex survivorship rule:

SIZEOF(b.FirstName)

- A. The length of the first name with the longest name will be the one selected.
- B. The length of the first name with the shortest name will be the one selected.
- C. The length of the first name of the current record will be less than the length of the first name of the best record.
- D. The length of the first name of the best record will always be greater than the length of of the street name of the current record.

Correct Answer: A

QUESTION 4
