**QUESTION 1**

Which Information Server client application must be used to manage project-level roles for DataStage?

- A. Director client
- B. Designer client
- C. WebSphere Information Services Director
- D. Web console for IBM Information Server

Correct Answer: D

QUESTION 2

A job validates credit card numbers with a reference file using a Join stage, which is hash partitioned by card number. Examination of Job Monitor reveals that some partitions process many more rows than others. Assuming adequate hardware resources, which action can be used to improve the performance of the job?

- A. Replace the Join with a Merge stage.
- B. Break the input file into multiple files.
- C. Alter the number of partitions in the \$APT_CONFIG_FILE.
- D. Use Round Robin partitioning on the stream and Entire partitioning on the reference.

Correct Answer: C

QUESTION 3

What role must a user have to delete shared metadata assets from the repository?

- A. Common Metadata User
- B. DataStage Administrator
- C. Information Analyzer User
- D. Common Metadata Administrator
- E. Business Glossary Administrator

Correct Answer: D

QUESTION 4

Your job sequence must be restartable. It runs Job1, Job2, and Job3 serially. It has been compiled with "Add

checkpoints so sequence is restartable". Job1 must execute every run even after a failure. Which two properties must be selected to ensure that Job1 is run each time, even after a failure? (Choose two.)

- A. Set the Job1 Activity stage to "Do not checkpoint run."
- B. Set trigger on the Job1 Activity stage to "Unconditional".
- C. In the Job1 Activity stage set the Execution action to "Reset if required,then run."
- D. Use the Nested Condition Activity with a trigger leading to Job1; set the trigger expression type to "Unconditional".

Correct Answer: AC

QUESTION 5

In which two situations is it appropriate to use a Sparse Lookup? (Choose two.)

- A. When accessing DB2 data using the DB2 API stage.
- B. When the output of the Lookup stage needs to be hashed partitioned.
- C. When reference data is significantly larger than the streaming data (100:1).
- D. When invoking a stored procedure within a database per row in the streaming link.

Correct Answer: CD
