QUESTION 1

How is the IBM Tivoli Endpoint Manager (TEM) Relay installation initiated?

- A. Install the TEM Relay from the TEM Client Deploy tool.
- B. Execute the IBM Tivoli Endpoint Manager Relay 8.1.x task from the TEM Console.
- C. In the TEM Installer, select Install Tivoli Endpoint Manager Components > Install Relays > Install Remotely.
- D. Log in to the desired computer with administrator privileges and copy the BES Installers\Relay folder from the TEM Server to the local hard drive.

Correct Answer: B

QUESTION 2

IBM Tivoli Endpoint Manager V8.1 (TEM) is being deployed in a highly distributed environment, and there are many remote locations with very slow WAN links back to a company's headquarters. How should relays be deployed to avoid excessive WAN traffic?

- A. Use a single relay in each remote location and use bandwidth throttling set to maximum.
- B. Use redundant relays in each remote location to ensure that Agents have a fail-over relay.
- C. Use a single relay in each remote location because multiple relays will congest the WAN connection.
- D. Use redundant relays at headquarters to ensure remote location WAN connections are not congested.

Correct Answer: B

QUESTION 3

Where are the original files used to patch a system stored in an IBM Tivoli Endpoint Manager V8.1 (TEM) environment?

- A. on the TEM Server
- B. on the TEM Database Server
- C. on content servers reachable by a TEM Server
- D. directly on TEM Relays in order to save bandwidth

Correct Answer: C

QUESTION 4

When creating a role in IBM Tivoli Endpoint Manager Web Reports, what is the function of Restrict View with a Filter?

- A. It constrains what the role can view.
- B. It provides an unrestricted view of all objects.
- C. It provides a drop-down list of available targets to the user.
- D. It allows users in the role to restrict what they can view by creating a filter.

Correct Answer: A

QUESTION 5

According to IBM documentation, when is it recommended to install an IBM Tivoli Endpoint Manager Relay?

- A. per 1,000 agents
- B. per 2,000 agents
- C. for every 500 concurrent users
- D. for every 5 VLANs in the environment

Correct Answer: A
