**QUESTION 1**

An administrator is looking at the Computers section of the Navigation Tree and wants to quickly confirm that communications work between the listed computers and server. Which two actions confirm communications without having a negative impact on the environment? (Choose two.)

- A. Create a Computer Property with a requirement to report back every 5 minutes.
- B. Select a few systems and use the right-click menu to send a refresh to the selected systems.
- C. Click Tools > Take Custom Action to create a NULL Task and take action against all systems
- D. Examine the Last Report time; this is only updated when the agent collects data and reports back.
- E. Locate a Fixlet that is applicable to the desired computers and take action against those systems.

Correct Answer: BC

QUESTION 2

The data is not updating in the database. Using the BigFix Deployment Health Checks in the IBM Tivoli Endpoint Manager Console, where is it verified that collected data is entered in the database?

- A. FillDB Bufferdir File Count
- B. InsertDB Bufferdir File Count
- C. GatherDB Bufferdir File Count
- D. CollectDB Bufferdir File Count

Correct Answer: A

QUESTION 3

Click the Exhibit button.

The screenshot shows the Tivoli Endpoint Manager Console interface. On the left is a navigation pane with categories like Fixlets and Tasks, Baselines, Analyses, Actions, Dashboards, Wizards, Custom Content, Custom Filters, Computers, Computer Groups, Unmanaged Assets, Operators, and Sites. The main area displays a table of unmanaged assets. The selected asset (IP 192.168.1.43) is shown in a detailed view below the table.

A customer is implementing Asset Discovery within their IBM Tivoli Endpoint Manager V8.1 (TEM) environment. They have previously run a scan and based on the exhibit, what can be concluded about the system using IP Address 192.168.1.43?

- A. This system has a TEM Agent installed.
- B. The system's TEM Agent may not be functional.
- C. This system does not have a TEM Agent installed.
- D. It is not possible to determine if the TEM Agent is installed or not.

Correct Answer: C

QUESTION 4

An IBM Tivoli Endpoint Manager (TEM) Console operator has been assigned management rights on a computer that is powered off. Is the computer visible in the operator console?

- A. Yes, if Wake on LAN has been enabled.
- B. Yes, the processing is done at the server level.
- C. No, it will only be visible when the Show Computer Fixlet is deployed.
- D. No, it will only be visible once the computer is powered on and the BES Client is started.

Correct Answer: D

QUESTION 5

What are the default roles available in IBM Tivoli Endpoint Manager Web Reports?

- A. Root, Normal, Read-only
- B. Root, Read/Write, Read-only
- C. Administrator, Normal, Read-only
- D. Administrator, Read/Write, Read-only

Correct Answer: C
