**QUESTION 1**

An author creates a report for burstng. In Report Studio, the author sets the burst type for the report to Directory entries. In Cognos Connecton, the author sets the run optons to burst the report and send the report by email. If the email addresses for the burst recipients are accessible by IBM Cognos BI, what is the expected result?

A. The report is burst to email addresses only.

B. The report is burst to both email addresses and directory entries.

C. The report is burst to directory entries only.

D. A warning message appears indicatng a confict in the run optons.

Correct Answer: B

**QUESTION 2**

In Report Studio, an author creates a list report containing columns for Staf Name, Order number, and Revenue. The author wants to burst this report to various sales staf members. Each member should see only data relatng to sales they have made. What must the author do to specify that the burst report output will contain only data for the appropriate sales staf member?

A. In the report layout, create a master-detail relatonship on the Staf Name data item.

B. In the report layout, add the Staf Name data item as a property of the List object.

C. In the burst optons for the report, use the Staf Name data item to specify the Burst Recipients.

D. In the burst optons for the report, use the Staf Name data item to specify the Burst Groups.

Correct Answer: D

**QUESTION 3**

An author creates a report in Report Studio. The report contains a parameter for the Product line query item. The author wants to let users drill through to this report from a variety of reports created using the GO Data Warehouse (query) package. To ensure that this target report contains data for the appropriate products, the author wants to limit the report cells that users can drill through from in source reports. What must the author do when creatng the drill-through defniton?

A. Set the Product line query item as the target of the drill-through defniton.

B. Set the Product line query item as the scope of the drill-through defniton.

C. Add a parameter for the Product line query to the drill-through defniton.

D. Delete all data items except for the Product line query item from the drill-through defniton.

Correct Answer: B

**QUESTION 4**

In Report Studio, when would the author need to unlock cells on a report?

A. To merge two report types into a single report.

B. To merge query items into a single column.

C. To merge a query item into a text item.

D. To merge report objects in table.

Correct Answer: B

**QUESTION 5**

In Report Studio, for which task would an author create a query calculaton?

A. Add report run-tme informaton to a report.

B. Apply conditonal formatng to data in a report.

C. Let users choose which flter to apply to a report.

D. Derive additonal informaton from the data source.

Correct Answer: D
