**QUESTION 1**

A report author has the following filter in a report:

[Product line] in ?pline?

The report author adds a Value prompt based on the existing parameter `pline\`. After adding the prompt, the Auto-submit property is defaulted to `No\` and cannot be changed to `Yes\`. What is the cause of this?

- A. Default selections are missing in the Value prompt.
- B. The Value prompt created based on the filter is a Multi-select prompt.
- C. A prompt based on an existing parameter as Auto-submit cannot be made.
- D. Auto-submit is a property that is only available for select and search prompts.

Correct Answer: A

QUESTION 2

A report author needs to create filters in Cognos Analytics ?Reporting.

What are the three different types of filtering?

- A. Required, Optional and Disabled
- B. Detailed, Summary and Parameterized
- C. Custom based in data item, Combined and Advanced
- D. Before Auto-Aggregation, After Auto-Aggregation and with Scope

Correct Answer: C

QUESTION 3

A report author is building a report intended for an iPad on the Cognos Mobile App. The report consists of two Charts that need to be side by side when the tablet is landscape and on top of each other when the tablet is landscape and on top of each other when the tablet is portrait.

What technique should be used to accomplish this?

- A. Make the size of both Charts a percentage of the page width.
- B. Contain the Charts in two cells of the same table, with a fixed size.
- C. Contain both charts in separate blocks, with fixed widths and box type set as inline.
- D. Use a conditional style on one of the Charts to adjust its position based on the orientation of the iPad.

Correct Answer: B

QUESTION 4

A company is using a model that was created in Compatible Query Mode (CQM). There is a report that must reference query subjects from two different packages.

How can this be accomplished?

- A. The report author cannot create reports that reference multiple Data sources.
- B. The report author can add multiple packages to the reports as Data sources and create the report as needed.
- C. The report author must use SQL nodes for all queries that reference the data items in the two packages and join them appropriately to get the desired results within the report.
- D. The report author can use user-defined SQL to develop the query from one of the packages and the other package to develop the other query and then join them appropriately to get the desired results within the report.

Correct Answer: D

QUESTION 5

A report author has been asked to create a list report with multiple facts from across the business. The desired outcome must ensure correlated and predictable results.

Which item must be included in the list report?

- A. Repeater table
- B. Conditional fact
- C. Model Query subject
- D. Conformed dimension

Correct Answer: C
