QUESTION 1

When running simultaneous cube builds, how can cube build times be decreased?

- A. Assign each Transformer process one CPU.
- B. Assign each Transformer instance one CPU.
- C. Use the same configuration files for each Transformer instance.
- D. Use a single-CPU server model.

Correct Answer: A

QUESTION 2

What does unique mean when applied to a level in a dimension map?

- A. The level is designated as a convergence level.
- B. The level must be the bottom level of the dimension.
- C. No two categories in the level can be derived from the same source value.
- D. The data history does not move with the categories as they move in the level.

Correct Answer: C

QUESTION 3

When the model contains two data sources that provide date values, how can the developer avoid ambiguity when Transformer sets the current time period?

- A. Disable the data source's ability to set the current time period.
- B. Assign the current date (obtained from the system clock) as the current period.
- C. Let Transformer assign the date closest to the model's creation date as the current period.
- D. Enter the initial current period and adjust it to match the system date and time.

Correct Answer: A

QUESTION 4

What can be done to apply member-based security if the model contains cube groups?

- A. Define the security for each member cube.

- B. Inherit the security that was used in the control cube.
- C. Create a hierarchical custom view.
- D. Create a descendant custom view.

Correct Answer: A

QUESTION 5

What can be created to provide newinsight into the data if Margin Ranges are defined as Low, Medium, and High, based on a calculated column using the revenue and cost columns?

- A. Scenario dimension
- B. Exception dimension
- C. Special category
- D. Calculated category

Correct Answer: B
