**QUESTION 1**

During the initial phase of the Guardium deployment, the Guardium administrator wants to figure out an ideal time period to purge data from the appliance based on the data load.

Which predefined Guardium report(s) allows the administrator to determine the current database disk usage of the Guardium Appliance?

- A. Disk Util report
- B. Aggregation/Archive log
- C. DB Server throughput report
- D. Buff Usage Monitor and System Monitor reports

Correct Answer: D

---

**QUESTION 2**

A Guardium administrator needs to monitor an Oracle database on a production database server.

Which component does the administrator need to install on this database server that will monitor the traffic?

- A. S-TAP
- B. Guardium Collector
- C. Guardium Installation Manager (GIM)
- D. Configuration Auditing System (CAS)

Correct Answer: D

---

**QUESTION 3**

A Guardium administrator manages portal user synchronization by using a Central Manager.

When a change is made on the Central Manager such as, for example, adding a Guardium user to a Guardium group, how long should be allowed for the update to be synced with the managed units in a fully working environment?

- A. 0minutes
- B. 15 minutes
- C. 30 minutes
- D. 60 minutes

Correct Answer: D

---

**QUESTION 4**

A Guardium administrator is registering a new Collector to a Central Manager (CM). The registration failed. As part of the investigation, the administrator wants to identify if the firewall ports are open-How can the administrator do this?

- A. Ask the company\\'s network administrators.
- B. Ask IBM technical support to login as root and verify.
- C. Login as CLI and execute telnet
- D. Login as CLI and execute support show port open

Correct Answer: D

---

**QUESTION 5**

The guard\_tap.ini of a UNIX S-TAP is configured with the following parameters: The collector that this S-TAP is sending data to has become unavailable and there is no failover option configured. A Guardium administrator must communicate the impact of this outage to users of the monitored database.

```
firewall_installed=1
firewall_fail_close=1
firewall_default_state=1
firewall_timeout=10
```

What should the administrator advise is the expected behavior for a database session?

- A. The session will not experience any latency or termination.
- B. No SQL can be executed and after 10 seconds the session will be terminated.
- C. in the first 10 seconds of the session SQL can be executed, then the session is terminated.
- D. in the first 10 seconds of the session no SQL can be executed, then the session will work as normal.

Correct Answer: C
