QUESTION 1

What is the maximum number of dashboards a user can create with IBM Security QRadar SIEM V7.2.8?

A. 10

B. 25

C. 100

D. 255

Correct Answer: D

Create custom dashboards that are relevant to your responsibilities. 255 dashboards per user is the maximum; however, performance issues might occur if you create more than 10 dashboards.

QUESTION 2

An IBM Security QRadar SIEM V7.2.8 deployment configured with High-Availability (HA) has both a

primary and secondary host. The administrator needs to test the operation of the primary high-availability

(HA) host automatic failover to the secondary HA host.

What must be configured to accomplish this test?

A. Configure the time interval of heartbeat timeout tests so the secondary HA host receives a response from the primary HA host within 2 minutes.

B. Configure the time interval of heartbeat timeout tests so the secondary HA host does not receive a response from the primary HA host within 2 minutes.

C. Configure the time interval of heartbeat ping tests so the secondary HA host receives a response from the primary HA host within a preconfigured time period.

D. Configure the time interval of the heartbeat ping tests so the secondary HA host does not receive a response from the primary HA host within a preconfigured time period.

Correct Answer: C

QUESTION 3

An Administrator working with IBM Security QRadar SIEM V7.2.8 needs to configure the deployment to

add a log source from IBM Bluemix.

What protocol is supported for this?

A. JDBC

B. LEEF

C. WinCollect

D. TLS Syslog

Correct Answer: D

QUESTION 4

An IBM Security QRadar SIEM V7.2.8 Administrator is given a file to import asset information directly to

the asset database.

What should the Administrator be aware of when using this data source?

A. The asset data being imported must contain one field no longer than 255 characters in length.

B. The asset data imported will have a default retention period of 120 days until flow data is received from the asset.

C. The asset reconciliation stage is bypassed and asset updates that are provided by users do not introduce asset growth deviations.

D. The asset data from users are paired with an asset based on a single identifier, the IP address and flow data is never the cause of asset growth deviations.

Correct Answer: C

QUESTION 5

An Administrator working with IBM Security QRadar SIEM V7.2.8 needs to copy data and configuration

backup files from the previous day to an off-site location.

What is the default location where these files can be found?

A. /store/backup

B. /store/exports

C. /store/postgres

D. /store/backupHost

Correct Answer: A

The default location is /store/backup. This path must exist before the backup process is initiated. If this path does not

exist, the backup process aborts. If you modify this path, make sure the new path is valid on every system in your deployment.
