QUESTION 1

A BPM application developer is creating an "Order Management" process that needs to wait for inventory readiness status from a separate inventory application. If the received status is "ready", the process can resume its regular flow. If the received status is "not-available", the process needs to start a "Re-stocking" process flow. The application developer has exposed an inbound web service in IBM BPM to be called by the external inventory application.

How can the BPM application developer configure the process to allow the response from the incoming web service request to direct the flow of the process? Associate the inbound web service with:

A. a service with a JavaScript invocation of an Ad-Hoc event in the "Re-stocking" process flow.

B. a service with a JavaScript invocation of an Ad-Hoc event in the "Order Management" process.

C. a service that invokes an Undercover Agent, and a receive message event on the "Re-stocking"process flow that is associated to the same Undercover Agent.

D. a service that invokes an Undercover Agent, and a receive message event on the "Order Management" process that is associated to the same Undercover Agent.
