**QUESTION 1**

An administrator determines that the system slows down whenever a specific query is run and that IDX- FILEA displays when a WRKACTJOB is performed. Which tool or command can assist the administrator in determining what is causing this to occur?

- A. ANZQRY
- B. ANZIDX
- C. System i Navigator Index Adviser
- D. IBM Systems Director Database Manager

Correct Answer: C

---

**QUESTION 2**

An administrator is creating an IBM i 6.1 guest partition on a Power 720 with no expansion units. The host partition is an IBM i 7.1 partition. The system has only one internal DVD, located in the CEO, which is allocated to the host partition.

The administrator has configured the partition profile, the client and server vSOSI adapter pair, a network server description and 12 storage spaces. There is no additional optical media device to start the D-mode IPL for this guest partition.

What is the fastest way for the administrator to complete the IBM i 6.1 installation?

- A. Use the existing DVD device that is allocated to the host partition.
- B. Reallocate the DVD device from the host partition to the guest partition.
- C. Configure another vSCSI adapter pair in order to access the existing DVD device.
- D. Convert the 6.1 DVD5 to .iso images, create a virtual optical device and load the iso images to it.

Correct Answer: A

---

**QUESTION 3**

What is the minimum special authority needed to run the PWRDWNSYS command?

- A. \*JOBCTL
- B. \*ALLOBJ
- C. \*SERVICE
- D. \*IOSYSCFG

Correct Answer: A

---

**QUESTION 4**

An administrator needs to install third party software into an iASP environment. The installation is failing when the program provided by the software company attempts to create and restore library objects. What is the most efficient way for the administrator to install the software while maintaining the command integrity of the system?

- A. Copy the software libraries into the system ASPThen create duplicate objects into the iASPRemove the new commands when the installation completes
- B. Create a copy of the CRTLIB and RSTLIB commands, which include the iASP name, into a library that is placed first in the system portion of the library listRemove the new commands when the installation completes
- C. Create a copy of the CRTLIB and RSTLIB commands, which include the ASP name, into a different library Then add that library to the user portion of the library listRemove the new commands when the installation completes
- D. Create a copy of the CRTLIB and RSTLIB commands, which include the ASP name, in a different library Then add that library to the install portion of the library listRemove the new commands when the installation completes

Correct Answer: B

---

**QUESTION 5**

A "previous release to current release" system migration is being performed. An application on the source system manages image files stored in the IFS, viewed using PCs.

The Go Save menu, option 21 (full system save), was used to create the backup tape used in the migration process.

After the data is migrated and the new system set up, none of the images are available.

Which situation on the source system IFS directory, at the time of the backup, is the most likely cause of the problem?

- A. The "Hidden file" attribute was set to "Yes"
- B. The "Can be saved" attribute was set to "No".
- C. The "Need to archive (PC)" attribute was set to "Yes".
- D. The "Need to archive (System)" attribute was set to "No".

Correct Answer: B
