**QUESTION 1**

An AIX instance was initially configured to communicate over a single network interface. The administrator plans to configure an EtherChannel using the existing network interface and an additional network interface.

Which is the correct sequence of steps to implement this configuration?

- A. Remove the existing IP information Add both interfaces as primary adapters Configure the IP address
- B. Configure the existing interface as a primary adapter Configure the additional interface as a backup adapter
- C. Configure the same IP address on the additional interface Add both adapters as primary adapters Remove the existing default route
- D. Add both adapters as primary adapters Configure the IP address as an alias on the additional interface

Correct Answer: A

QUESTION 2

In addition to enabling remote command execution, which task highlighted in the graphic below must be visited to enable an administrator with hmcoperoperator permissions to run HMC commands from another server using ssh?

HMC Management (HMC Version)

Operations

- View HMC Events
 - View the event log of HMC operations and activities
- Shut Down or Restart
 - Shut down or restart the HMC
- Schedule Operations
 - Schedule selected operations for the HMC
- Format Media
 - Format a DVD, diskette, or USB flash memory device.
- Back up HMC Data
 - Back up HMC information to DVD, to a remote system, or to a remote site
- Restore HMC Data
 - Restore critical HMC data from a remote source
- Save Upgrade Data
 - Save upgrade data to the HMC hard drive or DVD
- Change Network Settings ←
 - View current network information and change settings
- Test Network Connectivity
 - View network diagnostic information about the network protocols for the HMC
- View Network Topology
 - View and ping nodes within the management console's network topology
- Tip of the Day
 - Display tips for using the console
- View Licenses
 - Read the licenses for the product
- Change Default User Interface Settings
 - Customize the default appearance of the HMC user interface
- Change User Interface Settings
 - Customize the appearance of the HMC user interface
- Change Date and Time
 - Change the date and time for the HMC
- Launch Guided Setup Wizard
 - Step through setting up your HMC users, passwords, network settings, and customer notification of problems

Administration

- Change User Password
 - Change your password
- Manage User Profiles and Access
 - Add, copy, remove, and modify HMC system users and user profiles
- Manage Task and Resource Roles ←
 - Add, copy, remove, and modify managed resource and task roles
- Manage Users and Tasks
 - View the logged on users and the tasks they are running
- Manage Certificates
 - Create, modify, delete, and import certificates used on the HMC, and view certificate signing information
- Configure KDC
 - Key Distribution Center Configuration
- Configure LDAP
 - Enterprise Directory Service Configuration
- Remote Command Execution
 - Enable or disable the command line interface on an HMC
- Remote Virtual Terminal ←
 - Enable or disable virtual terminal connections for remotely connected HMC sessions
- Remote Operation ←
 - Control whether this HMC can be operated using a web browser from a remote workstation
- Change Language and Locale
 - Change the HMC user interface language and locale
- Create Welcome Text
 - Customize the greeting displayed before logging on
- Manage Data Replication
 - Share customizable data between HMCs including custom group data, customer information, and more
- Manage Install Resources
 - Add and remove operating environment instal image resources on the HMC

- A. "Change Network Settings" to open port 22
- B. "Remote Operation" to indicate that this HMC can be operated from a remote host
- C. "Remote Virtual Terminal" to enable virtual terminal connections for remotely connected HMC
- D. "Manage Task and Resource Roles" to give the hmcoperator task role permission to ssh to the HMC from a remote host

Correct Answer: A

QUESTION 3

How can administrators ensure that the Integrated Virtual Ethernet (IVE) adapters in their servers have the latest available firmware?

- A. By upgrading the given IBM Power Systems server to the latest available system firmware.

- B. By using inventory scout to query the installed firmware level against the available level.
- C. By using either the managing HMC, SDMC or IVM to query and update the adapter firmware.
- D. By using the lsmcode AIX command with the query flag.

Correct Answer: A

QUESTION 4

Why would the `mkfs -d /dev/cd0 -t/tmp/images all` command be run?

- A. To create installation or update images of all software packages from media in /dev/cd0
- B. To install all software packages from the media in /dev/cd0 that have prerequisites met on the system or in /tmp/images.
- C. To make a file in /tmp/images that lists all of the software packages on media in /dev/cd0
- D. To make a copy of all software in /tmp/images and store onto the writable media in /dev/cd0

Correct Answer: A

QUESTION 5

A NIM server is used to support different AIX Technology Levels among several clients. Each technology level is maintained in a separate lpp_source. Which command(s) will display what AIX fixes are available for several TL levels supported by a NIM server?

- A. `niminv -o fixget -a targets=lpp_source1,lpp_source2`
- B. `nim_update_check -lsumalpp_source1 nim_update_check -lsumalpp_source2`
- C. `nim -o cust -a fixes=update_all lpp_source1 lpp_source2`
- D. `nim -o lppmgr -a lppmgr_flags="lsb" lpp_source1, lpp_source2`

Correct Answer: A
