QUESTION 1

Which new z196 feature provides significant error detection and correction capabilities for bit, lane, DRAM, DIMM socket and memory channel failures?

- A. RAS
- B. RAID
- C. RACEv
- D. RAIM

Correct Answer: D

QUESTION 2

What is a key security differentiator of z/OS compared to distributed server operating systems?

- A. z/OS provides a role based access method.
- B. z/OS utilizes LDAP to provide an end-to-end security context.
- C. Applications run in enclaves which provide security by isolation.
- D. z/OS utilizes SAF products like RACF to provide end to end security context

Correct Answer: D

QUESTION 3

During which of the following activities do the customer and the technical specialist define post installation support?

- A. During the TDA (Solution Assurance)
- B. When establishing the system ship date
- C. When configuring the System z using eConfig
- D. During the installation of the equipment by the CE

Correct Answer: A

**QUESTION 4**

A customer is looking for a solution that delivers a workload management across the platforms that run his core application. Additionally he is interested in a continuous availability solution that controls all components of the application independent of the platform that is used for the deployment.

Which of the following makes zEnterprise the best match to those requirements?

- A. The new Infiniband coupling link of z196 offer the opportunity to interconnect all platforms. The Unified Resource Manager delivers a central tool to control all events.
- B. z/OS offers with Parallel Sysplex and WLM a best of breed solution. For the distributed part Tivoli System Automation for Multi Platforms (TSAMP) delivers the required functionality.
- C. The combination of Unified Resource Manager, GDPS and TSAMP meets all requirements without changes to the applications.
- D. The customer can consolidate all application parts either on z/OS or on Linux on System z to meet the requirements.

Correct Answer: C

QUESTION 5

A System z customer has a new CIO. The CIO is concerned about continuous operations and recovery following a site catastrophe. Which of the following addresses this issue?

- A. GDPS
- B. DR
- C. Parallel Sysplex
- D. CBU

Correct Answer: A
