QUESTION 1

Which IBM tape solution can be shared as a Tape Backup Infrastructure for System z with DESMSd55, System i with BRMS and Red Hat Linux with NBU\\?

- A. IBM Virtualization Engine TS7740
- B. IBM TS1140 with 007 Tape Controller
- C. IBM System Storage TS3500 Tape Library
- D. IBM System Storage T53310 Tape Library

Correct Answer: C

QUESTION 2

To install an IBM 3592-007 with attached drives housed in a TS3500 Tape Library, which of the following is required?

- A. TS3500 frame with mountings to install the 3592-007 and its switches
- B. Customer-supplied standard rack using switches in one of the TS3500 frames
- C. IBM 3953 frame with switches installed either in 3953 frame or one of the TS3500 frames
- D. IBM 3952 frame with switches installed either in 3952 frame or one of the TS3500 frames

Correct Answer: D

QUESTION 3

A customer has replaced an old virtual tape subsystem with a new TS7740 and would like to compare the batch run times before and after the change. What tool is available in IBM Tape tools to do this?

- A. VEHSTATS
- B. IOSTATS
- C. TAPEWISE
- D. Batch Magic

Correct Answer: B

QUESTION 4

What is a valid implementation for in-band encryption in z/OS using TS1 130 or TS1140 drives?

- A. LME with TS7700 and encryption configuration feature

- B. AMEwithTS1130 and appropriate software and device driver
- C. SME with 007 controller and CU encryption configuration feature
- D. LME with C07 controller and CU encryption configuration feature

Correct Answer: C

QUESTION 5

What function does the TS7700 Sync Mode Copy enable or perform?

- A. It copies the synchronized volumes between the clusters
- B. It synchronizes the copies of the TS7700 databases between clusters
- C. After writing the entire volume the TS7700 uses Sync Mode Copy to synchronize the data between all clusters
- D. When the host application issues an explicit synchronize operation all previously written records are replicated to another cluster

Correct Answer: D
