**QUESTION 1**

A developer is using a Doc Keyword Replace Service to replace an @ with a ~ in an EDI file inside the Graphical Process Modeler (GPM). The base configuration does not have settings for the keyword and replace settings. Where in the GPM can the developer add service settings into the BPML?

- A. View Menu > Source
- B. Service Editor > Advanced
- C. Tools Menu > Source Manager
- D. Not able to add in GPM, must add in the text editor.

Correct Answer: B

QUESTION 2

A Business Process (BP) has been identified that failed due to an issue that was introduced with an external system not having a file system available. The BP has OnFault logic that traps the error and sends an email notification. The administrator has talked with the appropriate resources and confirmed the issue has been resolved so all future processing works as desired. To reprocess the failed BP, which two actions must be executed for each of the failed instances? (Choose two.)

- A. Restart
- B. Resume
- C. Advanced Restart
- D. Terminate and Resubmit
- E. Interrupt and Resubmit

Correct Answer: AC

QUESTION 3

A company requires all data at rest to be stored securely. How can this be configured in IBM Sterling B2B Integrator (SBI)?

- A. Import a System Certificate.
- B. Create a PGP Server Profile.
- C. Enable Document Encryption.
- D. Configure an Obscure Data service.

Correct Answer: C

**QUESTION 4**

A customer has moved the IBM Sterling B2B Integrator (SBI) database server to a new ipaddress/ hostname and needs to make the changes to SBI so that it can connect to the new server. Which procedures should be followed?

- A. Edit /properties/sandbox.cfg and change all old database ipaddress/hostname to the new one, save and run setupfiles.sh.
- B. Edit /properties/jdbc.properties.in and change all old database ipaddress/hostname to the new one, save and run setupfiles.sh.
- C. Edit /properties/jdbc.properties and change all old database ipaddress/hostname to the new one, save and run setupfiles.sh.
- D. Edit /properties/jdbc_customer.properties.in and add all database pools into this file with new ipaddress/hostname, save and run setupfiles.sh.

Correct Answer: A

QUESTION 5

A mapping specialist is creating a map to transform data from an incoming EDI document to an internal XML format. The internal XML format requires a customer ID which is not available in the EDI document. It needs to be retrieved from the Business Process (BP) executing the map. How can the mapping specialist include the customer ID in the map?

- A. Use standard rule Select.
- B. Use extended rule getFromProcessData.
- C. Specify XPath on the segment's Properties > Business Process Data.
- D. Add a temporary structure on the input side and map to Process Data.

Correct Answer: A
