QUESTION 1

Based on the screen shot, how many days will documents and other trackable data stay in the system by default?

The screenshot shows the 'BackupService: Configure' page in the IBM Sterling B2B Integrator Admin Console. The 'Administration Menu' on the left lists various system components. The main configuration area includes:

- Default values that business processes should remain in the system:**
 - Days: 2
 - Hours: 0
- Default values that trackable business process information remains in the system:**
 - Days: 1
 - Hours: 0
- Directory where archived data will be stored:**
 - Backup Directory: /si_install/arc_data
- Expired Business Processes should be:**
 - Archived
 - Purged

Navigation buttons at the bottom include Back, Next, Cancel, and Save.

- A. 1 day
- B. 2 days
- C. 3 days
- D. The setting is controlled at the individual Business Process (BP) level.

Correct Answer: C

**QUESTION 2**

An analyst is responsible for implementing an AS2 solution for their company using IBM Sterling B2B Integrator (SBI). After certificates and connections information have been gathered, what is the first thing that must be created in the system?

- A. Partners
- B. Code List
- C. Relationship
- D. Organization

Correct Answer: D

QUESTION 3

Given the following BPML, what will the value of "c" be in ProcessData when the Business Process (BP) completes successfully?

```
<process name="si_test">
  <rule name="rule1">
    <condition>a < 2</condition>
  </rule>
  <sequence name="start">
    <assign to="a">1</assign>
    <assign to="b">8</assign>
    <assign name="Assign" to="c" from="/ProcessData/b/text()"></assign>
  <sequence name="test">
    <assign to="a" from="a + 1"></assign>
    <choice name="test1">
      <select>
        <case ref="rule1" activity="test1"/>
        <case ref="rule1" negative="true" activity="test2"/>
      </select>
      <sequence name="test1">
        <assign to="b" from="b - 2"></assign>
        <assign to="c" from="c + 1"></assign>
        <repeat ref="test"/>
      </sequence>
      <sequence name="test2">
        <assign to="c" from="c + b"></assign>
      </sequence>
    </choice>
  </sequence>
</process>
```

A. 10

B. 11

C. 15

D. 16

Correct Answer: D

QUESTION 4

A developer is importing a Business Processes (BP) called ftp_CompanyA into production via Resource Manager and Object Updates is set to Yes. What happens if this BP already exists?

A. The BP is not imported.

B. The BP gets renamed to ftp_CompanyA_TEMP.

C. The import appends a new BP version to the list of previously saved versions, incrementing by one.

D. A backup is made of default ftp_CompanyA BP in a file called backup.xml and then it is overwritten.

Correct Answer: C

QUESTION 5

A company is planning to offer FTPS connection to its community of trading partners. They already have one server certificate in IBM Sterling B2B Integrator (SBI) that they want to use for the FTPS server in the production environment. In the

development environment they want to use a self-signed test certificate.

Where can the test certificate be created?

A. Trading Partner > Digital Certificates > CA

B. Trading Partner > Digital Certificates > Trusted

C. Trading Partner > Digital Certificates > System

D. Trading Partner > Digital Certificates > Cert Manager

Correct Answer: C
