

C90-05A^{Q&As}

Advanced Cloud Architecture

Pass SOA C90-05A Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.pass4itsure.com/c90-05a.html>

100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by SOA Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

The Intra-Storage Device Vertical Tiering pattern is applied to resolve issues caused by:

- A. Multiple cloud storage devices that need to vertically scale at the same time
- B. Cloud consumers that are limited to using one cloud storage device to store multiple applications and services
- C. Different disk types across redundant cloud storage devices that use different storage methods
- D. Cloud consumers that have cloud storage devices in different geographical regions that need to be combined

Correct Answer: B

QUESTION 2

The _____ program that is implemented when applying the Hypervisor Clustering and Zero Downtime patterns can be used to move a virtual server to a different physical server host at runtime.

- A. resilient watchdog
- B. load balancer
- C. live storage migration
- D. live VM migration

Correct Answer: D

QUESTION 3

The system that is established by the application of the Dynamic Failure Detection and Recovery pattern can address which of the following issues: (Choose Three)

- A. cloud-based bare-metal physical servers need to be provisioned with operating systems
- B. cloud-based IT resources encountering runtime failure conditions require intervention
- C. the manual process to solve cloud-based IT resource failure is too slow
- D. the manual recovery of IT resources leads to additional failures

Correct Answer: BCD

**QUESTION 4**

Applying the Redundant Storage pattern establishes a system made of _____ and _____ cloud storage devices. The _____ cloud storage device keeps a copy of the data for failover purposes.

- A. primary, secondary, primary
- B. load balanced, clustered, load balanced
- C. primary, secondary, secondary
- D. load balanced, clustered, clustered

Correct Answer: C

QUESTION 5

The cloud architecture that is established by the application of the Storage Workload Management pattern can rely on the storage capacity monitor to: (Choose Two)

- A. notify the storage capacity system whenever a cloud storage device is being over-utilized
- B. migrate LUN5 to different cloud storage devices
- C. detect when the workload of a cloud storage device has reached a pre-defined threshold
- D. act as an external interlace to a cloud storage service

Correct Answer: AC
