QUESTION 1

Which two statements describe the process of collocation?

A. Placing IBM Tivoli Storage Manager (TSM) database volumes in the same directories.

B. Isolating archive and backup data to separate storage pools.

C. Combining multiple TSM servers onto a single physical server.

D. Isolating a client or group of clients to their own volumes within a storage pool.

E. Isolating a single or group of filespaces to their own volumes within a storage pool.

Correct Answer: DE

Explanation: * When collocation is by client node Volume selection order: 1st: A volume that already contains files from the same client node

* When collocation is by file space Volume selection order: 1st: A volume that already contains files from the same file space of that client node

Note: With collocation enabled, the server attempts to keep files belonging to a group of client nodes, a single client node, or client file space on a minimal number of sequential- access storage volumes. Collocation reduces the number of volume mounts required when users restore, retrieve, or recall a large number of files from the storage pool. Collocation thus reduces the amount of time required for these operations.

QUESTION 2

If a file is deleted from the customer\\'s server, what determines how long the IBM Tivoli Storage Manager server retains the backup?

A. The Retain Only setting in backup copy group

B. The Retain Extra setting in backup copy group

C. The Version Extra setting in backup copy group

D. The Versions Deleted setting in backup copy group

Correct Answer: A

Explanation: You specify the number of days to keep backup versions with two parameters:

*

Retain Extra Versions (how many days to keep inactive backup versions; the days are counted from the day that the version became inactive)

*

Retain Only Versions (how many days to keep the last backup version of a file that has been deleted)

QUESTION 3

An alert represents an error message that is issued by an IBM Tivoli Storage Manager server. What does this icon mean when shown at the alert?

A. Warning; Processing can continue, but problems might occur later.

B. Severe: Processing stops. The server will preempty the tasks and stop.

C. Critical: Processing cannot continue. The issue must be corrected immediately.

D. Info: Processing continues with an informational message, and no action is required.

Correct Answer: C

Explanation: * Example:

http://www-01.ibm.com/support/docview.wss?uid=swg21651428andaid=20

* The severity codes give an indication of the severity of the issue that generated the message. The

severity codes and their meanings are as follows:

E Error Processing cannot continue.

W Warning Processing can continue, but problems may occur later. I Information Processing continues.

User response is not necessary.

QUESTION 4

Which log records the sessions of the web client?

A. webcli.log

B. adsmweb.log

C. tsmwebcl.log

D. dsmwebcl.log

Correct Answer: D

Explanation: All Web client messages are written to the Web client log file, dsmwebcl.log.

QUESTION 5

Once the nightly backups are finished, what is one additional way to protect the files?

A. run dedupe

B. expire the database inventory

C. migrate the primary storage pools to the copy storage pools

D. back up the primary storage pools to the copy storage pools

Correct Answer: D

Explanation: After the initial full backup of your storage pools, incremental storage pool backups are done nightly.
