**QUESTION 1**

Which scheduling mode is initiated by the server contacting a registered client?

- A. All
- B. Polling
- C. Initiated
- D. Prompted

Correct Answer: D

Explanation: Tivoli Storage Manager provides two scheduling modes: client- polling and server-prompted.

QUESTION 2

Which two types of server tasks are shown in the Operations Center?

- A. active
- B. db reorgs
- C. encrypted
- D. completed
- E. missed schedules

Correct Answer: AE

Explanation: A: TSM Servers The status indicator shows whether the Tivoli Storage Manager servers that are managed by the Operations Center are available to provide data protection services to clients.

E: TSM Clients A client is considered to be at risk if a problem occurs during its most recent scheduled backup, or during a backup that starts within a specified time interval. The term backup also includes archive operations for Tivoli Storage Manager for Enterprise Resource Planning clients. Use the information that is shown in the TSM Clients section to check for failed or missed backups and to determine whether backup schedules are running as expected.

QUESTION 3

Which statement is true regarding the recovery plan file?

- A. It is a list of all nodes to be recovered from an archive.
- B. It contains information required to recover an archive created by a node.
- C. It is created automatically whenever the MOVE DRMEDIA command is run.
- D. Is a template that contains information including commands for recovering the IBM Tivoli Storage Manager

database.

Correct Answer: A

Explanation: Example:

Task: Display a list of recovery plan files that were created for this server using the specified device class.

Command

```
query rpf file devclass=* format=detailed
```

Output

Recovery Plan File Name: ALASKA.20000406.170423

Node Name: BRANCH1

Device Class Name: REMOTE

Recovery Plan File Type: RPF FILE

Mgmt Class Name: STANDARD

Recovery Plan File Size: 16,255 Bytes

Marked for Deletion: Yes

Deletion Date: 06/12/2000 13:05:31

Recovery Plan File Name: ALASKA.20000407.170845

Node Name: BRANCH1

Device Class Name: REMOTE

Recovery Plan File Type: RPF SNAPSHOT

Mgmt Class Name: STANDARD

Recovery Plan File Size: 16,425 Bytes

Marked for Deletion: No

QUESTION 4

What is an incremental by date backup?

- A. It backs up files that have never been backed up before.
- B. It backs up files that have been previously backed up using snapshot backup.
- C. It backs up files with a modification date and time that is later than that of the last full incremental backup of the same files in that filespace.

D. It backs up files with a modification date and time that is the same as that of the last full incremental backup of the same files in that filespace

Correct Answer: C

Explanation: The client backs up only those files whose modification date and time is later than the date and time of the last incremental backup of the file system on which the file resides. Files added by the client after the last incremental backup, but with a modification date earlier than the last incremental backup, are not backed up.

QUESTION 5

What is the purpose of a copy storage pool?

- A. to provide temporary space for reclamation
- B. to provide protection for data in primary pools
- C. to provide the storage space needed to back up a client
- D. to store a copy of the IBM Tivoli Storage Manager database

Correct Answer: B

Explanation: BACKUP STGPOOL (Back up primary storage pool to copy storage pool) Use this command to back up primary storage pool files to a copy storage pool.
