**QUESTION 1**

A project team is using the Scrum process template process lifecycle that comes as a default process template with Rational Team Concert (RTC). The team is expanded to include a solution architect to the team, and the development process needs to be changed so that the architect can review the requirements prior to the commencement of sprint cycles. What should be done to achieve this using RTC and CLM? (Choose two.)

- A. modify the Scrum process template by extending the work item lifecycle to include a new "State" for architecture review
- B. modify the Scrum process template by adding a new "Work Area Category" to cover the steps done by the architect
- C. configure Rational Software Architect Design Manager to initiate a design review at the start of each sprint
- D. modify the Scrum process template by adding a new "Role" for architects
- E. modify the Scrum process template by the adding a new "Reviewer Type" to cover the reviews performed by the architect

Correct Answer: AD
