**QUESTION 1**

The Response Time Breakdown report shows a table for an aggregation of all instances of a selected page element. Which two layouts are available? (Choose two.)

- A. simple layout
- B. hierarchical layout
- C. table layout
- D. UML layout

Correct Answer: AD

QUESTION 2

After a test run, the tester sums up all the individual requests response times but discovers that the total is not equal to the overall page response time. What are three causes of the difference? (Choose three.)

- A. There is a defect in IBM Rational Performance Tester 8.2 that will be fixed in the next fix pack.
- B. The page response time is more than the sum of the requests because it accounts for time taken to set up the connections.
- C. The page response time is less than the sum of the requests because several requests could have been executed concurrently.
- D. The page response time is more than the sum of the requests because custom code for response correlation in a page is executed serially and is added to the page response time.
- E. The page response time is less than the sum of the requests because the response for the request is in the system cache.

Correct Answer: BCD

QUESTION 3

Why should you clear the cache when you record a test?

- A. to force the browser to download all page elements resulting in a more accurate test
- B. to force the browser to download all page elements resulting in longer page load times
- C. to simulate a new user who has never used the application
- D. to simulate actual browser behavior

Correct Answer: A

QUESTION 4

What happens to all the page elements in a test?

- A. They are grouped by page unless the application under test uses AJAX.
- B. They are grouped by page as a visual aid to enhance readability.
- C. They are assigned dynamically to separate virtual testers at playback time.
- D. They use separate records from a single datapool.

Correct Answer: B

QUESTION 5

Workload analysis is a design-time activity that includes which four processes? (Choose four.)

- A. identifying the performance bottlenecks of the application
- B. identifying the workload to be simulated or emulated in the performance tests, in terms of number of actors or actor classes and actor profiles
- C. identifying the actors and actor characteristics to be simulated or emulated in the performance tests
- D. clarifying the objectives of performance testing and the use cases
- E. determining the performance measures and criteria
- F. identifying the quality of application architecture

Correct Answer: BCDE
