QUESTION 1

What happens to all the page elements in a test?

- A. They are grouped by page unless the application under test uses AJAX.
- B. They are grouped by page as a visual aid to enhance readability.
- C. They are assigned dynamically to separate virtual testers at playback time.
- D. They use separate records from a single datapool.

Correct Answer: B

QUESTION 2

What does a datapool provide?

- A. one variable for each virtual tester in a schedule
- B. one variable for each test schedule that is run
- C. one record containing one or more variables for each virtual tester in a schedule
- D. one record containing one or more variables for each test schedule that is run

Correct Answer: C

QUESTION 3

Workload analysis is a design-time activity that includes which four processes? (Choose four.)

- A. identifying the performance bottlenecks of the application
- B. identifying the workload to be simulated or emulated in the performance tests, in terms of number of actors or actor classes and actor profiles
- C. identifying the actors and actor characteristics to be simulated or emulated in the performance tests
- D. clarifying the objectives of performance testing and the use cases
- E. determining the performance measures and criteria
- F. identifying the quality of application architecture

Correct Answer: BCDE

QUESTION 4

Which statement is true about paced loops?

- A. They are used to pace the execution of steps in a test.
- B. They are the basis for running loops within schedules.
- C. They verify that information is being sent between the application under test and IBM Rational Performance Tester.
- D. They execute n iterations of an element per time segment.

Correct Answer: D

QUESTION 5

Which four pages are available in the Citrix Performance test report? (Choose four.)

- A. Performance Summary
- B. Response versus Time Summary
- C. User Action Throughput
- D. Request Rate versus Response Time
- E. Server Timeout
- F. Number of Users versus Response Time

Correct Answer: ABCE
