800,000+ Satisfied Customers

QUESTION 1

After enabling High Performance Extensible Logging (HPEL), which configuration change will improve performance?

A. Enabling HPEL Text logging

B. Disabling HPEL Text logging

C. Increasing Maximum log size

D. Disabling Log record buffering

Correct Answer: B

The text log file does not contain any content that is not also stored in either the log data repository or trace data repository. You can disable the text log to enhance server performance.

QUESTION 2

When server1 is running profile1, in which folder would the application logs be found?

A. \profiles\server1\logs

B. \profiles\profile1\logs

C. \profiles\profile1\logs\server1

D. \profiles\server1\logs\profile1

Correct Answer: D

QUESTION 3

Which of the following is true about creating multiple security domains?

A. A new security domain can be created only using the administrative console.

B. Global security must be enabled before creating new multiple security domains.

C. Only users assigned to the security-admin role can create new multiple security domains.

D. If a unique name for the domain is not specified, the system will automatically create one.

Correct Answer: C

Only users assigned to the administrator role can configure multiple security domains.

QUESTION 4

What is one of the steps to enable single sign-on (SSO) between multiple IBM WebSphere Application Servers?

A. Retrieve an LTPA key file from IBM Support.

B. Generate an LTPA key file from IBM Rational Application Developer.

C. Retrieve the LTPA key file from the installation media, and import into the WebSphere Integrated Solutions Console.

D. Export an LTPA key and password from one of the IBM WebSphere Application Server cells, and import it into other cells that are participating in SSO.

Correct Answer: C

QUESTION 5

Which is true when installing interim fixes silently?

A. No response file is needed.

B. A password file is required.

C. Greater permissions are needed.

D. An online repository must be used.

Correct Answer: C

Use the Update Installer program from the same user ID that installed the product that you are updating. Otherwise, the file ownership mismatches might require correction by the root user.

Note: An interim fix is also known as a patch.

Incorrect Answers:

A: A response file is required. For example:

[Windows]: update.bat -silent -options "responsefiles\file_name"

D: A repository can be an online location that hosts the interim fix files and other configuration information, or a local file system that contains the files.
