**QUESTION 1**

A corporation has two distinct cells configured with several applications on each one, and wants to have only one Web server instance to distribute workload to both cells.

What can an administrator do to achieve this?

- A. Install an On Demand Router in front of the Web server, and install the plugin.cfg on it.
- B. Register both deployment managers in one Job Manager, and federate the Web server in the Job Manager.
- C. Federate the Web server on both deployment managers, and run the GenPluginCfg command in each one.
- D. Generate the plug-in.cfg in each cell. Then, run the pluginCfgMerge script, and install the merged plugin.cfg onto the Web server.

Correct Answer: D

---

**QUESTION 2**

To prepare for configuring dynamic operations and dynamic clusters in the environment, what must the administrator do first?

- A. Create a service policy.
- B. Create multiple servers.
- C. Create the On Demand Router.
- D. Create multiple unfederated nodes.

Correct Answer: A

**QUESTION 3**

When verbose Garbage Collection is enabled, in which file(s) does the operating system collect the data?

- A. trace.log
- B. activity.log
- C. SystemOut.log and SystemErr.log
- D. native\_stdout.log and native\_stderr.log

Correct Answer: D

Depending on the operating system in use, the verboseGC output will be written to the following file by default: AIX,

Linux, or Windows: native\_stderr.log Solaris or HP-UX native\_stdout.log
